

Battery & Electrical Care Checklist

Battery Maintenance

- Check electrolyte levels and refill with distilled water as needed.
- Clean terminals and apply corrosion protectant.
- Keep batteries charged during storage.

Electrical System

- Inspect power cords for cracks or frays.
- Use surge protection with shore power.
- Test converter and inverter regularly.

Safety & Replacement

- Replace batteries older than 5 years.
- Recycle old batteries properly.
- Consider lithium upgrades for longer lifespan.
