

Winterization Guide

Water System

- Drain all water tanks: fresh, gray, and black.
- Bypass and drain the water heater.
- Pump RV antifreeze through lines until visible at each faucet.
- Remove and store any in-line filters.

Propane & Appliances

- Turn off propane and check lines for leaks.
- Clean refrigerator and freezer; leave doors open slightly.
- Run furnace briefly to confirm operation.

Exterior & Storage

- Inspect roof and reseal if necessary.
- Clean and dry awnings before storing.
- Cover tires and windows to protect from UV damage.
- Disconnect and store batteries in a cool, dry place.
