EXTERIOR FEATURES

Awning: Keep out of the sun with the roll up awning. The awning is controlled by the Firefly interface, simply press the touch screen switch to extend or retract.

Power Entry Steps: A safe wide step with non-slip strips allows for ease stepping into or out of this Roadtrek. These steps automatically extend or retract when the doors are opened or closed. Easy, low to the ground, step ups are also pet friendly.

AUTOMOTIVE SAFETY GLASS

These are premium luxury limousine style windows. "Not" typical RV windows.

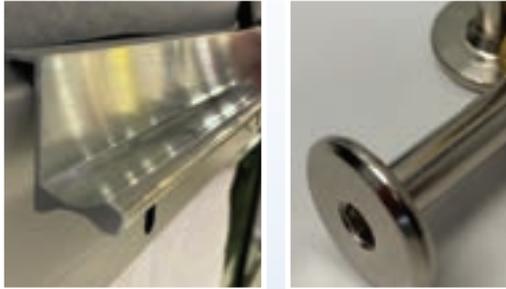

Macerator and Waste Valves: Roadtrek Premium models use the traditional gravity feed system PLUS an electronic pump Macerator system which provides fast, hygienic, waste disposal. (Excluding Pivot Model.)

Outdoor Shower: Rinse off any dirty paws or adventure gear.

ENGINEERING

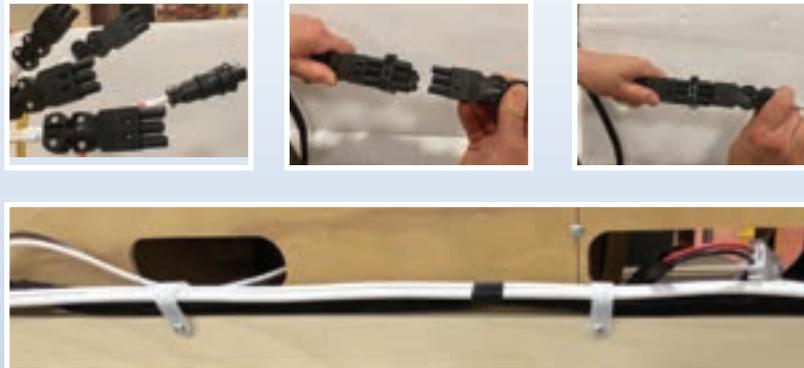

Durable, reliable, and innovative. All Roadtrek models are quality inspected during every stage of assembly.

Roadtrek uses only METAL cabinet hanger brackets and secure rivet nut / bolt fasteners for installation of overhead cabinetry. This method of construction provides lasting anchor strength. Cabinets can withstand varied road conditions and everyday use without fatigue.

Our cabinets are custom CNC cut to duplicate the sidewall profile of the Van. This process improves the amount of usable space inside the vehicle. This gives 8% extra usable interior space.

There is simply NO better wiring harness connection system available. Positive latching for superior electrical connections.

Base cabinets are precision docked into notches in the subfloor. This extra step keeps cabinets "rock solid" in place preventing fatigue from hard braking and rough road travel.

Roadtreks provide maximum fresh water holding capacity. These well engineered tank designs utilize otherwise wasted space inside the vehicle. One tank which holds 20 gallons of fresh water is located under the coach. The other, bonus tank, of 17 gallons of fresh water is uniquely concealed behind the cab area and isn't visible inside the coach once the interior is complete.

Plumbing lines that pass-through chassis steel are rubber grommets to protect the integrity of the system and prevent future wear issues.

The Under Hood Generator (GU) charges the coach 600 AMP Lithium batteries when the chassis engine is running.

Important: Useable power must be topped up to maintain adequate battery reserve

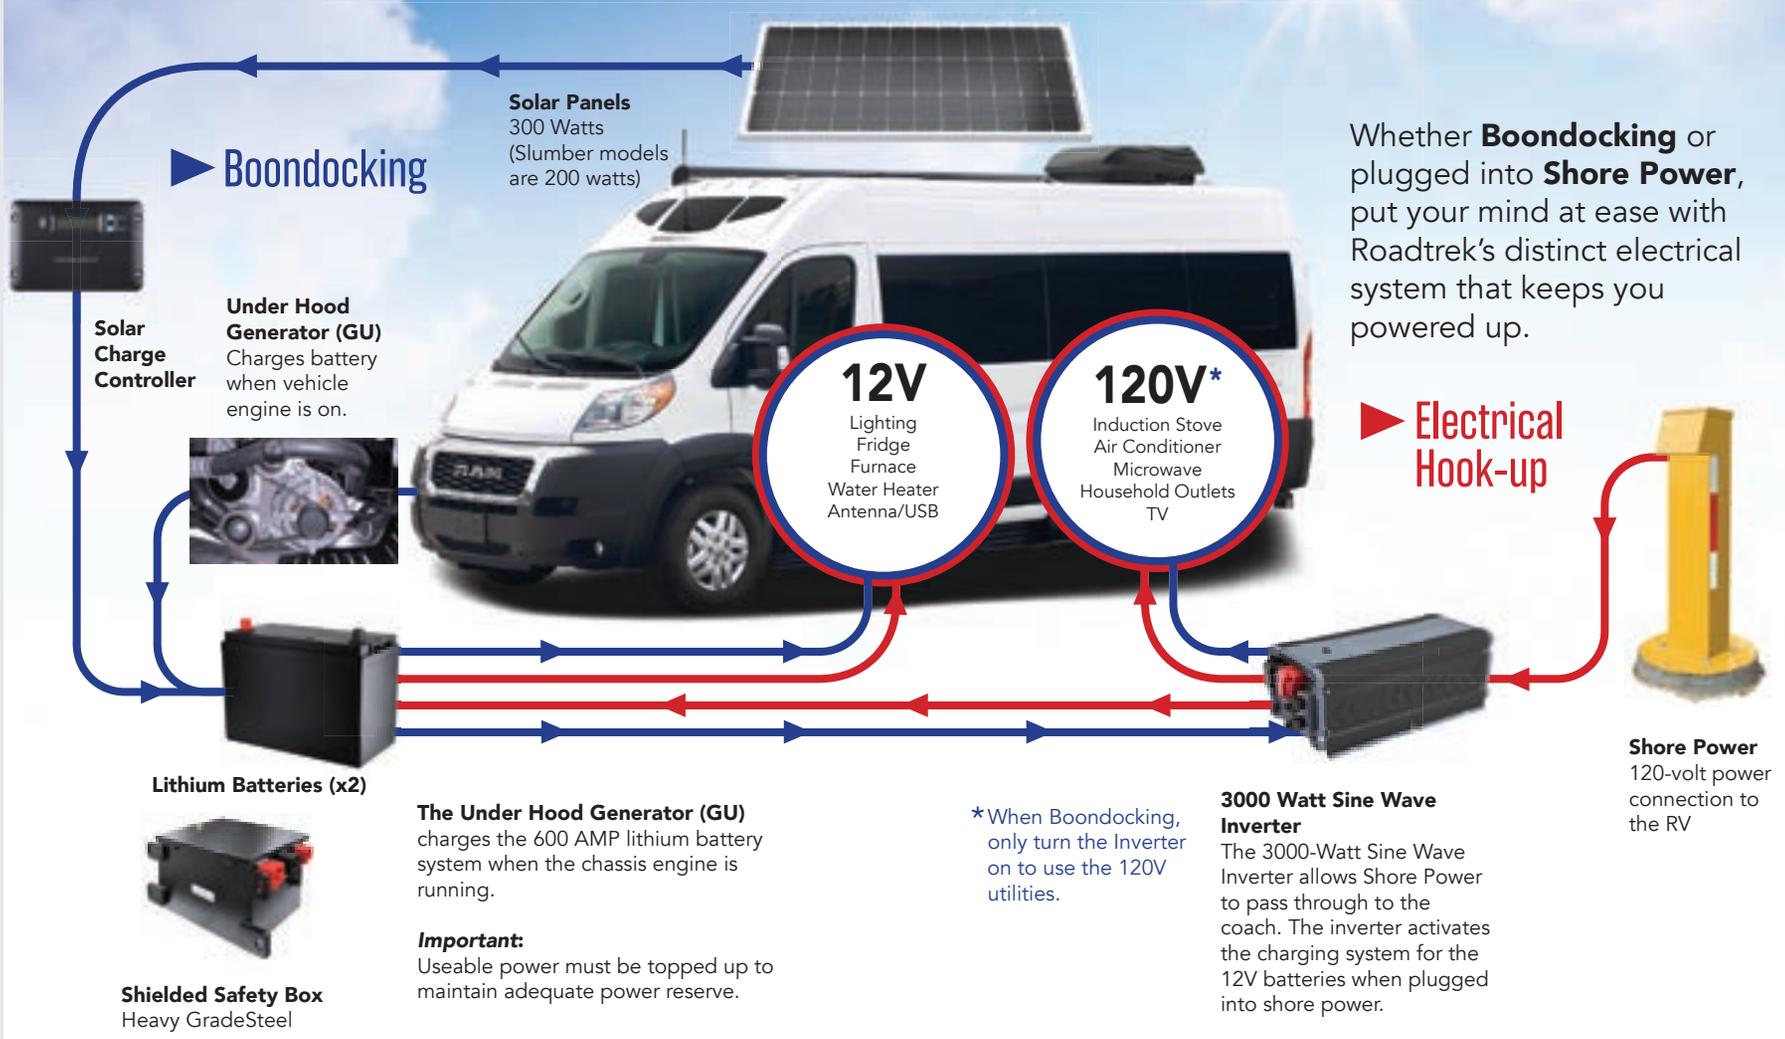

Whisper Quiet Using Chassis engine idle is extremely quiet.

Campground Friendly

Fast recharge rate for house batteries

Output of GU is rated 280 Amps/hr.

Whether **Boondocking** or plugged into **Shore Power**, put your mind at ease with Roadtrek's distinct electrical system that keeps you powered up.

Electrical Hook-up

CONVENIENCE AT YOUR FINGERTIPS — Touchscreen Tablet

Ease of Operation — The function of each button is clearly displayed on appropriately sized buttons that are logically placed and easy to read, providing feedback to the operator of the status of each function.

Added Convenience — Operate multiple lights and systems from one convenient location with the simple touch of a button.
