

# 2021 Wildcat Product Information

EACH WILDCAT MAXX STARTS WITH AN 8", 10" OR 12" FORMED 'I' BEAM TREATED CHASSIS THAT IS PRE-CAMBERED.

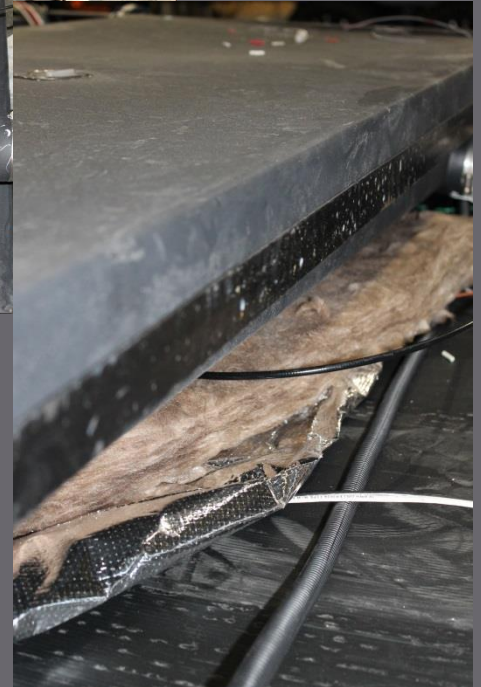

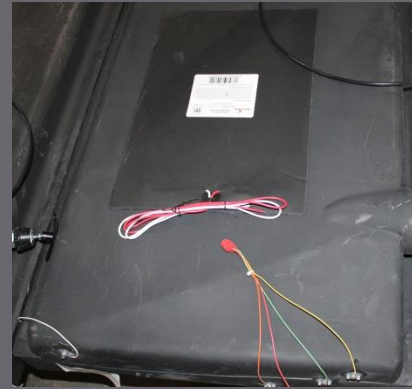

WILDCAT USES HEAVY DUTY 4,400LB & 5,200LB AXLES ON ALL MODELS. THIS GIVES EACH UNIT BETWEEN 2,223 LBS.. AND 4,946 LBS.. OF CARGO CAPACITY. IT ALSO MEANS YOU GET 12" X 2" BRAKES FOR 7,000 LBS. OF STOPPING FORCE PER AXLE. SELF-ADJUSTING BRAKES ARE A NICE BONUS THAT AUTOMATICALLY ADJUST THEMSELVES WITH EVERY FORWARD ROLLING STOP!

WILDCAT OVERSIZED TANKS ARE PLACED IN-BETWEEN THE FRAME RAILS AND CROSS MEMBERS FOR SUPREME STABILITY AND STRENGTH.

EACH OF THE 4 HOLDING TANKS COMES STANDARD WITH R-7 FIBERGLASS INSULATION & R-38 REFLECTIVE ASTRO-FOIL INSULATION UNDERNEATH. EACH TANK ALSO COMES STANDARD WITH A 12 VOLT TANK HEATER TO KEEP YOUR FLUIDS FROM FREEZING EVEN IN THE HARSHTEST OF WEATHER CONDITIONS

WILDCAT HAS THE STRONGEST FLOORS IN THE RV INDUSTRY. MOST MANUFACTURERS TODAY LAMINATE THEIR FLOORS WITH ALUMINUM FRAMING, BLOCK FOAM INSULATION, AND 2 LAYERS OF STAGGERED 1/8" LUAN PANELS. OVER TIME, THE PANELS (WHICH WERE NOT MEANT TO BE FLOORING) BREAK DOWN AND CAUSE THE FLOOR TO DELAMINATE. WILDCAT TAKES THIS CONSTRUCTION ONE STEP FURTHER AND LAMINATES OUR FLOOR WITH AN ADDITIONAL LAYER OF 1/2" DYNASPAN® DECKING WITH A 25 YEAR WARRANTY. YOU WILL NOT FIND A STRONGER FLOOR – PERIOD!\*

\*Travel Trailers Only

ONCE YOUR FLOOR IS LAMINATED TO DYNASPAN, YOUR WILDCAT TRAVEL TRAILER FLOOR IS THEN COVERED IN A COMPLETE SINGLE LAYER OF DARCO UNDER-BELLY MATERIAL. THIS LAYER WORKS JUST LIKE GORTEX® TO KEEP MOISTURE FROM ENTERING YOUR UNIT, BUT ALLOWS THE NATURAL MOISTURE THAT BUILDS UP TO ESCAPE WITH ONE-WAY LEAK PROTECTION.

YOUR WILDCAT TRAVEL TRAILER IS COVERED WITH A SINGLE SHEET OF DYNASPAN® FLOOR DECKING, ON TOP OF THE LAYER OF STAGGERED LUAN PANELING. WITH NO SEAMS, THERE IS NO CHANCE FOR WATER TO PENETRATE YOUR FLOOR AND CAUSE SWELLING LIKE OTHER FLOOR DECKING USED BY OUR COMPETITION.

OUR DYNASPAN® FLOOR DECKING COMES WITH A 25 YEAR WARRANTY AGAINST STRUCTURAL PANEL FAILURE CAUSED BY MANUFACTURING DEFECTS, GLUE BOND FAILURE AND DELAMINATION. TRY FINDING THAT FROM OUR COMPETITION!

**Maxx Strong  
Laminated Floors**

EVERY WILDCAT FLOOR IS 100% COVERED BY RESIDENTIAL FLOORING WITH A 3 YEAR WARRANTY. YES, EVEN UNDER THE CARPET!

THE LINOLEUM IS APPLIED WITH A RESIDENTIAL GLUE THAT COVERS 100% OF THE DYNA-SPAN® FLOORING TO MAKE SURE THAT YOUR FLOORING DOESN'T RIP, TEAR, SCRATCH, PERMANENTLY INDENT OR CRACK IN THE COLD CLIMATES.

BECAUSE WILDCAT GLUES 100% OF THEIR FLOORING DOWN, WE DON'T GET BUBBLES IN OUR LINOLEUM LIKE OUR COMPETITION THAT USES "FLOATING FLOORING" LIKE BEAUFLO® THAT IS NOT GLUED.

WILDCAT VACUUM BONDS BOTH SIDE WALLS, ALL 3 WALLS OF THE SLIDE-OUT AND THE CEILING OF THE SLIDE FOR MAXIMUM STRENGTH AND INSULATION.

WILDCAT SIDEWALLS ARE FRAMED COMPLETELY IN ALUMINUM. EVERY OPENING WE HAVE LIKE WINDOWS, ENTRY DOOR, BAGGAGE DOORS ARE FRAMED ON ALL 4 SIDES. EVEN SOMETHING AS SMALL AS AN OUTSIDE PLUG OR VENT IS FRAMED AND WELDED ON ALL 4 SIDES.

WILDCAT PUTS WOOD INSIDE SOME OF THE ALUMINUM STUDS TO MAKE SURE THE SCREWS HAVE SOMETHING SOLID FOR A SECURE ATTACHMENT FOR ITEMS LIKE CABINETS AND THE FIBERGLASS FRONT CAP.

R-10 HIGH DENSITY BLOCK FOAM INSULATION IS CAREFULLY CUT AND PLACED IN EVERY OPENING BETWEEN ALL THE WELDED ALUMINUM STUDS FOR MAXIMUM INSULATION VALUES!

BOTH WILDCAT TRAVEL TRAILERS AND 5<sup>TH</sup> WHEELS COME STANDARD WITH A HIGH GLOSS, GEL-COATED, FIBERGLASS FRONT MOLDED CAP WITH BED LINER TO REDUCE ROCK CHIPS. THE CAP HELPS WITH AERODYNAMICS AND LOOKS BEAUTIFUL!

LOOK AT ALL THE RE-REINFORCEMENT THAT GOES IN BEHIND THE GEL-COATED FIBERGLASS FRONT CAP TO HELP WITH STRENGTH WHILE TOWING DOWN THE HIGHWAY.

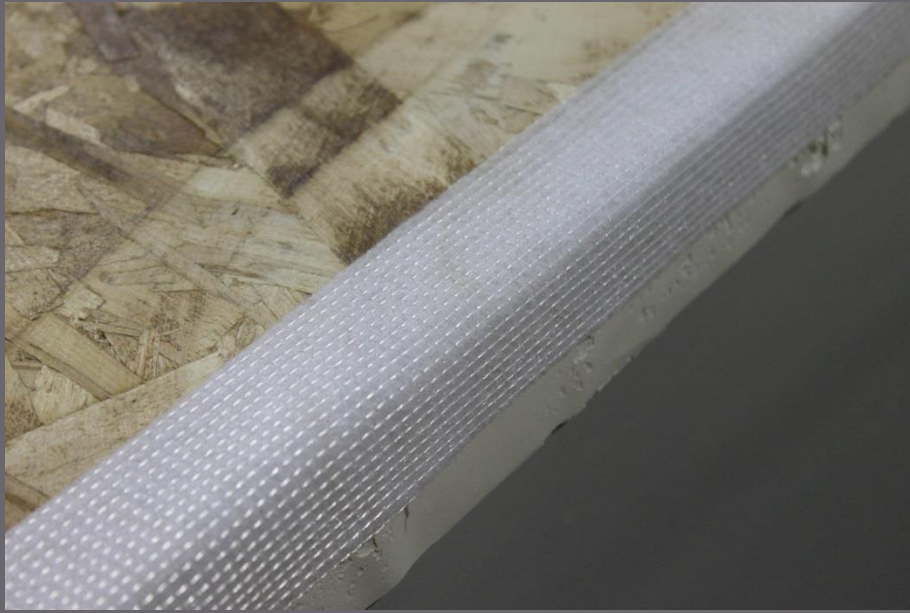

BEHIND EACH FRONT CAP AND IN THE END WALL AND CEILING, WILDCAT USES A DOUBLE LAYER OF R-7 FIBERGLASS INSULATION PLUS A LAYER OF THE R-38 REFLECTIVE ASTRO-FOIL INSULATION. WILDCAT USES MORE INSULATION IN OUR PRODUCTS THAN ANY OF OUR COMPETITION.

EACH WILDCAT ROOF IS PROTECTED BY A COTTON & FIBERGLASS SHEATHING SO THE EDGES DON'T CUT THROUGH THE RUBBER ROOFING. WE THEN ROLL ON GLUE OVER 100% OF THE ROOF DECKING BEFORE APPLYING THE 1-PIECE PVC ROOF WITH A 15 YEAR WARRANTY.

# Self Adjusting Brake Systems

LIPPERTCOMPONENTS INC

Stop worrying about improperly adjusted brakes...  
...and get up to 50% better stopping time

Trailer with Lippert Self Adjusting Brakes\*

(Stopping distance at 60 mph)

Trailer with unadjusted standard electric brakes\*

## Did you know...

Did you know that it is recommended to adjust the brakes on your trailer every **3 months** or **3,000 miles**? This can be costly, and is commonly a **NEGLECTED** task that most trailer owners fail to do. With **Lippert Components Self Adjusting Brake Systems**, trailer owners will have **peace of mind** knowing their brakes are properly adjusted to give ample stopping time for the dangers that lie ahead.

Still having a hard time deciding? See for yourself how Lippert Self Adjusting Brakes can save you time and money!

### Time/Expense Benefits:

Let's assume a tandem axle trailer is towed 6,000 miles in one year. Lippert Components recommends that your trailer brakes be adjusted every 3,000 miles. Each individual brake adjustment takes on average 15 minutes at a standard dealer labor rate of \$100/hour. That's a total of **2 hours** of labor **every year** costing you **\$200!**

**Doesn't \$0.00 sound better than \$200?\***
