SLED/ATV DECKS

THE BEST OF THE BEST

The all new Mammoth telescoping deck extension + removable bridges.

Inexpensive. Innovative. **Functional.**

Mammoth telescoping deck extension is fully adjustable in length, and width for loading anywhere on the deck. Adjusting length or width is as easy as removing two quick pins. This is the most simple, yet revolutionary deck extension on the market.

Accessories **made right.**

Every now and again, we release new accessories that are compatible with our products such as our top selling Telescoping extension

- 100% durable aluminium construction.
- Fully adjustable in length and width.
- Inexpensive and practical design.
- Includes two movable "bridges"
- Pre installed glides on each bridge for traction.
- Place ramp and load directly on the back of the extension.
- Bridges stow easily above ramp while in ramp hanger.

Mammoth telescoping deck extensions are compatible with all 2021 and later models of decks. Each extension will fully retract into the deck itself, and take no storage space. The included bridges stow above the ramp in the deck's ramp hanger for easy usage.
