Exterior Trash Hatch. Avoid dragging messy trash through your coach. Empty the kitchen trash from outside.

Easy-Glide Basement Storage Draw

Side opening baggage compartments provide safe access to enormous basement storage areas opening and closing with ease like a traditional hinged door and the slam latch holds the door securely for a dry, sealed compartment.

Hydro-Hot
Heating System

Hydro-Hot, the innovative solution for heating a diesel powered motorhome. This unique system heats by distributing hot liquid to highly efficient heat exchangers strategically located in zones of the coach putting the heat where you need it when you want it. Hydro-Hot is not a forced air system thus providing constant, quiet, non drying heat evenly throughout your motorhome keeping you toasty warm in the worst cold weather. Additionally Hydro-Hot provides on-demand hot water eliminating the need for a separate hot water heater.

Raised Rail Chassis design allows for maximized basement storage compartments

Lowered engine placement makes it possible to offer residential seven and a half foot ceiling height in the bedroom and residential bed height. Residential bed height makes it comfortable getting in and out of bed and unobstructed space around the bed for safety mobility in the dark.

SOLID HARDWOOD CABINETS

**PRE-DRILLED
HARDWOOD
CONSTRUCTION**

Our residential style cabinets are constructed of solid hardwood doors and fronts that are pre-drilled and screwed then they are stained and top coated with a furniture grade finish that provides long lasting beauty and durability as well as adding strength and quietness to your motorhome.

COMPETITOR'S CABINETS

Other companies use wrapped cabinet fronts prone to peeling, fading and tearing. The softer composite wood used does not hold screws as well as hardwood resulting in loss of strength and squeaking. Discoloration will degrade the beauty and lower the value of the motorhome.

Dual metal H-Ducted air conditioning system with foil bubble wrapped insulation for superior climate control.

Comfort Plus furniture by Gulf Stream Coach Features residential styling, solid construction, total comfort and a comprehensive warranty.

FLUSH FLOOR slide out rooms

Gulf Stream offers true flush floor slide out rooms to give you more headroom in the slide and eliminates the step up into the slide room that you will experience in many of our competitors motorhomes.

Seamless FIBERGLASS ROOF

Excellent Weathering - Maintaining the vehicle's quality appearance enhances its resale value.

Tear Resistance - Flexroof's hard abuse resistant finish resists tearing, a condition that can cause leaks and lead to expensive repair.

Low Maintenance - Road grime can easily be removed with normal cleaning maintenance. Rubber chalking due to solar breakdown of the roof surface is eliminated, preserving the original appearance and resale value of the vehicle.

Stain Resistance - Fiberglass Flexroof is designed to resist staining and maintain its quality appearance.

Structural Integrity - Unlike conventional EPDM rubber roof membranes, Flexroof is a structural component of the roof system.

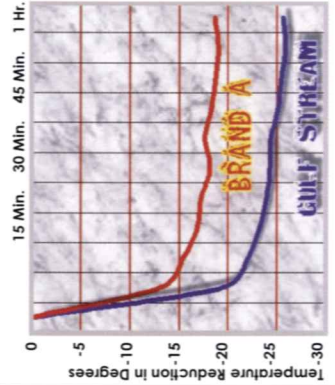

One Piece Textured Fiberglass -

Helps dissipate heat and prevents tree limbs from tearing or scratching your roof.

GULF STREAM VS. BRAND A Cool Down Comparison

- At 15 minutes, Gulf Stream cooled 7 degrees cooler.
 - At 30 minutes, Gulf Stream cooled 9 degrees cooler.
 - At 1 hour, Gulf Stream cooled 9 degrees cooler.
- Finally, empirical data demonstrating the efficiency and performance of a roof air conditioning system versus a floor air conditioning system.

ALL STEEL OVERHEAD STRUCTURE

TUFFTRUSS
6000 lbs.

The Cradle of Strength super strength truss system is unmatched in the RV industry. The structural subfloor foundation begins by welding a network of integrated steel trusses to the chassis rail. Specifically designed to distribute and transfer the tremendous forces from the coach to the chassis rail, these trusses are individually tested to withstand 6,000 pounds each. An all steel overhead structure installed above the cockpit brings strength and rigidity to the upper portion of the coach providing a safe strong platform to install a TV that will not break free in an impact while maximizing overhead storage.
