Estimated Wet Weight = 3,350 lbs.

At Eagle Cap Campers, Inc. we know that today's truck camper buyers have many choices available to them. Many of those choices are quite good; however our goal at Eagle Cap Campers, Inc. is to provide today's truck camper buyer with the best possible value for their hard earned dollar.

The 850 Model adds even more living space by incorporating a dinette slide-out and a larger bathroom. Not only will this model fit a long or short box pickup, but with the "short box option" you can add a generator and more outside storage. The dinette slide-out may be deleted if desired.

Solid Upholstery

Patterned Upholstery

Carpet

Market share is important, however we feel that quality, value and customer satisfaction trumps market share any day. This will always be our primary consideration in building truck campers.

Our 950 Model is our best selling model; it is designed for a long box pickup and is very spacious for a 9 1/2 ft. camper. With a deluxe pantry next to the refrigerator, the kitchen becomes very user friendly. The 950 Model comes standard with outside storage compartments, one of which can be optioned for generator use. The dinette slide-out may be deleted if desired on this model also.

Eagle Cap Camper's use of vacuum-bonded walls, roofs, floors, sub-floors, risers and wings, along with fully welded aluminum frames, ensures that the purchaser of an Eagle Cap Camper will own one of the lightest, strongest and most durable campers on the market today. Along with one-piece full front and rear fiberglass caps, and gel-coat fiberglass sidewalls and lower sections, we think it's one of the best looking too!

For those looking for even more living space may we suggest the 1050 Model. This rear (large) kitchen, mid-bath design is well suited for those longer trips with large hanging ward, additional interior storage, and divider curtains for separating bedroom, bath and kitchen/dining areas. An optional entertainment package is available which includes 15" flat LCD screen TV, DVD/CD/MP3 player, and an AM/FM stereo all of which fold away neatly when not in use.

For 2006 we offer four camper sizes from 8 ft. to 10 1/2 ft. Starting with the 800 Model for those looking for a non-slide out camper with full size appliances and considerable storage. This model also provides a comfortable and easy to use rollover couch for increased floor space. The 800 Model will fit either long or short box trucks.

**LIMITED WARRANTY** — Eagle Cap Campers, Inc. warrants, to the original purchaser, and subsequent owner(s) (with a \$250 warranty transfer fee), this recreational vehicles to be free of defects in material and workmanship under normal use, with reasonable care and maintenance for two (2) years and for structural

integrity for two (2) years, from the date of purchase. Individual manufacturer's warranties cover separate appliances and components used on our product. Consult your dealer or warranty card supplied in the warrant packet for details. All specifications, equipment and prices are subject to change without prior notice. Eagle Cap

Campers, Inc. reserves the right to improve models without incorporating these changes to models provided earlier. Consult your local truck and RV dealer to assure a safe and proper match between your truck and an Eagle Cap Camper.
