

Truck Caps & Lids | Commercial Caps | Cargo Management

Wherever you go, whatever you do, Jason has you covered.

Our History

Jason Caps began because of one family's vision to build sturdy and durable pickup bed caps for an emerging US market. Jason was one of the first "truck shell" manufacturers to switch to fiberglass construction methods in the mid-1970s.

Jason Today

Our 45,000 sq. ft. Elkhart, Indiana facility manufactures fiberglass truck caps and lids with all the skill, expertise and craftsmanship this region of the country is famous for. Our state-of-the-art Ottawa, Kansas facility adds another 90,000 sq. ft. of open- and closed-mold fiberglass manufacturing capacity, automotive-grade paint lines and curing ovens, innovative safety systems and equipment that make our plant a safer place to work while building the best products possible.

Build Your Own

Easily spec-out your own Jason cap or lid online and receive a quote directly from your nearest dealer. Visit www.JasonCaps.com and select "Build Your Own".

COMPACT CANISTER

The Mountain Top Evo features the smallest canister on the market, measuring just 8.28 inches in height by 9.93 inches in width.

ACCESSORY TRACK

Mountain Top retractable covers have built-in accessory tracks standard, compatible with racks from Rhino-Rack[®], Yakima[®], and Thule[®].

WATER DRAINAGE

The Six-Point water management system means the Mountain Top Evo can drain up to 10 gallons of water per minute.

SUPERIOR STRENGTH

With an over-400 lb weight capacity on top of the cover, the Mountain Top Evo can handle all your real world situations.

SLEEK INFINITY DESIGN

The Mountain Top Evo features a modern infinity edge top of bed rail design that improves water flow and gives you increased load capacity inside your truck bed.

RIGOROUS TESTING

Our tops go through rigorous testing in order to ensure that our products provide the highest quality and reliability as possible.

Built to protect your gear from the toughest environments, the Mountain Top Evo Retractable Cover sets the industry standard in design, quality, and functionality.
