# Dometic Legless Motorized Awning

Your Coach House Platinum III has been equipped with the Dometic 9500 series legless motorized awning. 12 volt electrical power will allow the unit to automatically retract using the “house” batteries in the event of unforeseen inclement weather.

**Make sure your Battery Cutoff Switch is in the ON position  
any time the Electric Awning is deployed.  
Damage to your Awning or Motorhome may  
occur if power is not available in the event of  
inclement weather.**

There is a motion sensor attached to the lead rail of the awning which will force the awning to retract if the motion becomes violent enough to cause damage to the unit.

The remote control for the awning is located just inside the main motorhome door on the “Tower of Power”.

Clean your awning with mild soap and water only.
