Ultra Lite towability – proven construction that lasts

Freedom Express is one of Coachmen RV's most popular brands with time-tested construction, combined with customer driven innovations. We focus on offering a wide selection of incredibly lightweight and durable travel trailers. These Ultra Lite RVs are ideal for towing with half-ton pick-up trucks and SUVs for maximum fuel efficiency.

All models are built with lightweight, corrosion resistant, Alumicage™ construction utilizing air-craft grade aluminum material throughout the walls for superior strength. Plus, Azdel Onboard® composite wall panels withstand rot, mold and water damage for years of worry-free use.

Explore our selection for the ultimate in safety and reliability:

Freedom Express Ultra Lites –
Packed with industry leading features.

Liberty & Maple Leaf Editions –
Include high end amenities usually reserved for travel trailers and fifth wheels costing thousands more.

Select – Value added light weights.

Storage

A Proud History of Quality and Value...Coachmen RV, a brand you can trust!

Coachmen RV products have been on US roads and highways since 1964. Since then, over 750,000 Coachmen recreational vehicles have been produced. In December 2008, Coachmen RV became a proud brand of Forest River, Inc., a Berkshire Hathaway Company. We're headquartered in Middlebury, Indiana with our primary manufacturing facilities on nearly 120 acres, and approximately 13 acres under roof.

195 RBS

RV COMPOSITE PANELS

AZDEL ONBOARD

Lightweight Freedom Express features the combination of Azdel Onboard RV composite panels and Alumaticage Construction to maximize towability; both are environmentally friendly.

Azdel composite panels are produced using a patented blend of polypropylene and fiberglass to create a durable, lightweight, water and temperature resistant, odorless and environmentally friendly wall that will increase the life of your RV.

Weight Matters
50% Lighter than wood

Let it Rain
No mold, rot, mildew, warping or delamination

Unaffected by changes in temperature & humidity

Twice the thermal insulation of plywood

Free of formaldehyde, toxic odors and chemicals

Longer RV life

Quieter RVs

No deforestation

Knock on Wood

Traditional Luan Sidewall Panels:

- Absorb and retain water
- Affected by humidity and temperature changes
- Susceptible to mold, rot, warpage and delamination
- Imported
- Heavier
- Inferior thermal insulation and noise blocking

Avoid Costly Water Damage
• Water and wood don't mix

- Water can cause rot, mold and delamination of wood sidewall panels causing thousands of dollars in damage.

Soak Test

- 60 Day soak test
- Wood has visible mold and decay requiring wall repair
- AZDEL was 100% unaffected

A fully walkable roof makes maintenance and inspections safe and easy.

81"

The 81" interior height throughout each Freedom Express model results in taller slide rooms and exceptional 14" overhead kitchen cabinet storage. (Other brands have 12" overhead cabinets.)

This exclusive utensil drawer provides handy storage. Seamless Edge countertops are standard on Freedom Express. Solid surface countertops are standard on Liberty and Maple Leaf.

Automotive windshield front cap

BUILT BETTER

Stable-Ryd® Suspension

- Spread axle improves weight distribution.
- Wide track axles provide a wider, more secure stance on the road.
- Spread axle design allows us to reduce the tongue weight for optimum performance.
- Spread axle design reduces sway caused by crosswinds.

Lightweight

- Laminated sidewalls, rear wall and floor
- Azdel behind the fiberglass
- Bow trusses aluminum and wood
- Rod and angle crossmembers in frame
- All tanks mounted under floor to lower center of gravity and improve interior storage.

Aerodynamic

- Aerodynamic front profile (Cuts through the air)
- Enclosed underbelly reduces turbulence/drag. (Select models)

Construction

- | | |
|--|--|
| 1. Crowned trusses | 6. Aluminum framed openings |
| 2. Aluminum reinforced with 3/8" roof decking | 7. Fully welded tubular aluminum floor structure |
| 3. Tufflex PVC roofing (with 15 year warranty) | 8. Powder E-coated, welded I-beam frame |
| 4. Azdel composite panels | 9. Dexter® E-Z Lube® axles |
| 5. Welded aluminum structure, vacuum-bonded sidewalls and flooring | 10. Stable-Ryd® spread axle design (25' and above) |

PUT TO THE TEST

Every Freedom Express unit undergoes rigorous testing before delivery, to ensure customer satisfaction.

- All tanks are filled with water and then drained, to check for leaks. Toilets and showers are filled with water and drained, to assure the underbelly has no leaks.
- All appliances undergo hy-pot testing. The hy-pot test sends quick, high voltage through all electrical lines, to make sure all lines are clear and appliances are working properly. An additional continuity test is conducted to make sure there are no shorts and the unit is grounded.
- Finally, every Freedom Express is Seal Tech tested to check for exterior leaks. The unit is completely closed and pressurized with up to 40 pounds of air, then hand sprayed with soapy water. Bubbles indicate a leak. Any detected leaks are repaired and the unit is retested. Once the unit passes these inspections, and is weighed, it's ready for delivery.

Exterior Features

Stable Ryde Spread Axles provide better weight distribution, handling and improved towing.

Fully Lighted Pass-thru Storage with a 24" x 48" outdoor resin table stored above.

Solid fold-in steps are standard on Freedom, Liberty and Maple Leaf models.

As a certified green RV, we utilize effective production techniques combined with healthy materials, plus efficient usage of energy and water to produce a high quality RV with less environmental impact.

Features and Options listed above may not be available on all models.

COACHMEN INTERACTIVE MOBILE MANUALS

Download your Coachmen mobile app or visit our dynamic online manual to enhance your ownership experience. These interactive options provide incredible ease and insight into use, maintenance and enjoyment of your Coachmen product. Ranging from "How-To" videos, pictures and illustrations of various components, systems and features to fully searchable content and downloadable PDFs for individual component owner's manuals, answers are always just a click away.

GVWR (Gross Vehicle Weight Rating) - is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, occupants, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

GCWR (Gross Combined Weight Rating) - is the maximum permissible loaded weight of your motor home and any towed trailer or towed vehicle. Actual GCWR of this vehicle may be limited by the sum of the GVWR and the installed hitch receiver maximum capacity rating; see hitch rating label for detail.

GAWR (Gross Axle Weight Rating) - is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by each axle.

UVW (Unloaded Vehicle Weight)* - is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s), including full fuel, all fluids and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

*Estimated Average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** - is the amount of weight available for fresh potable water, cargo, passengers, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity.

**Estimated average based on standard build optional equipment.

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities.

The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit. Actual towing capacity is dependent upon your particular loading and towing circumstances, which includes the GVWR, GAWR and GCWR as well as adequate trailer brakes. Please refer to the Operator's Manual of your vehicle for further towing information.
