2002 PONTOON SERIES

2575

RLX

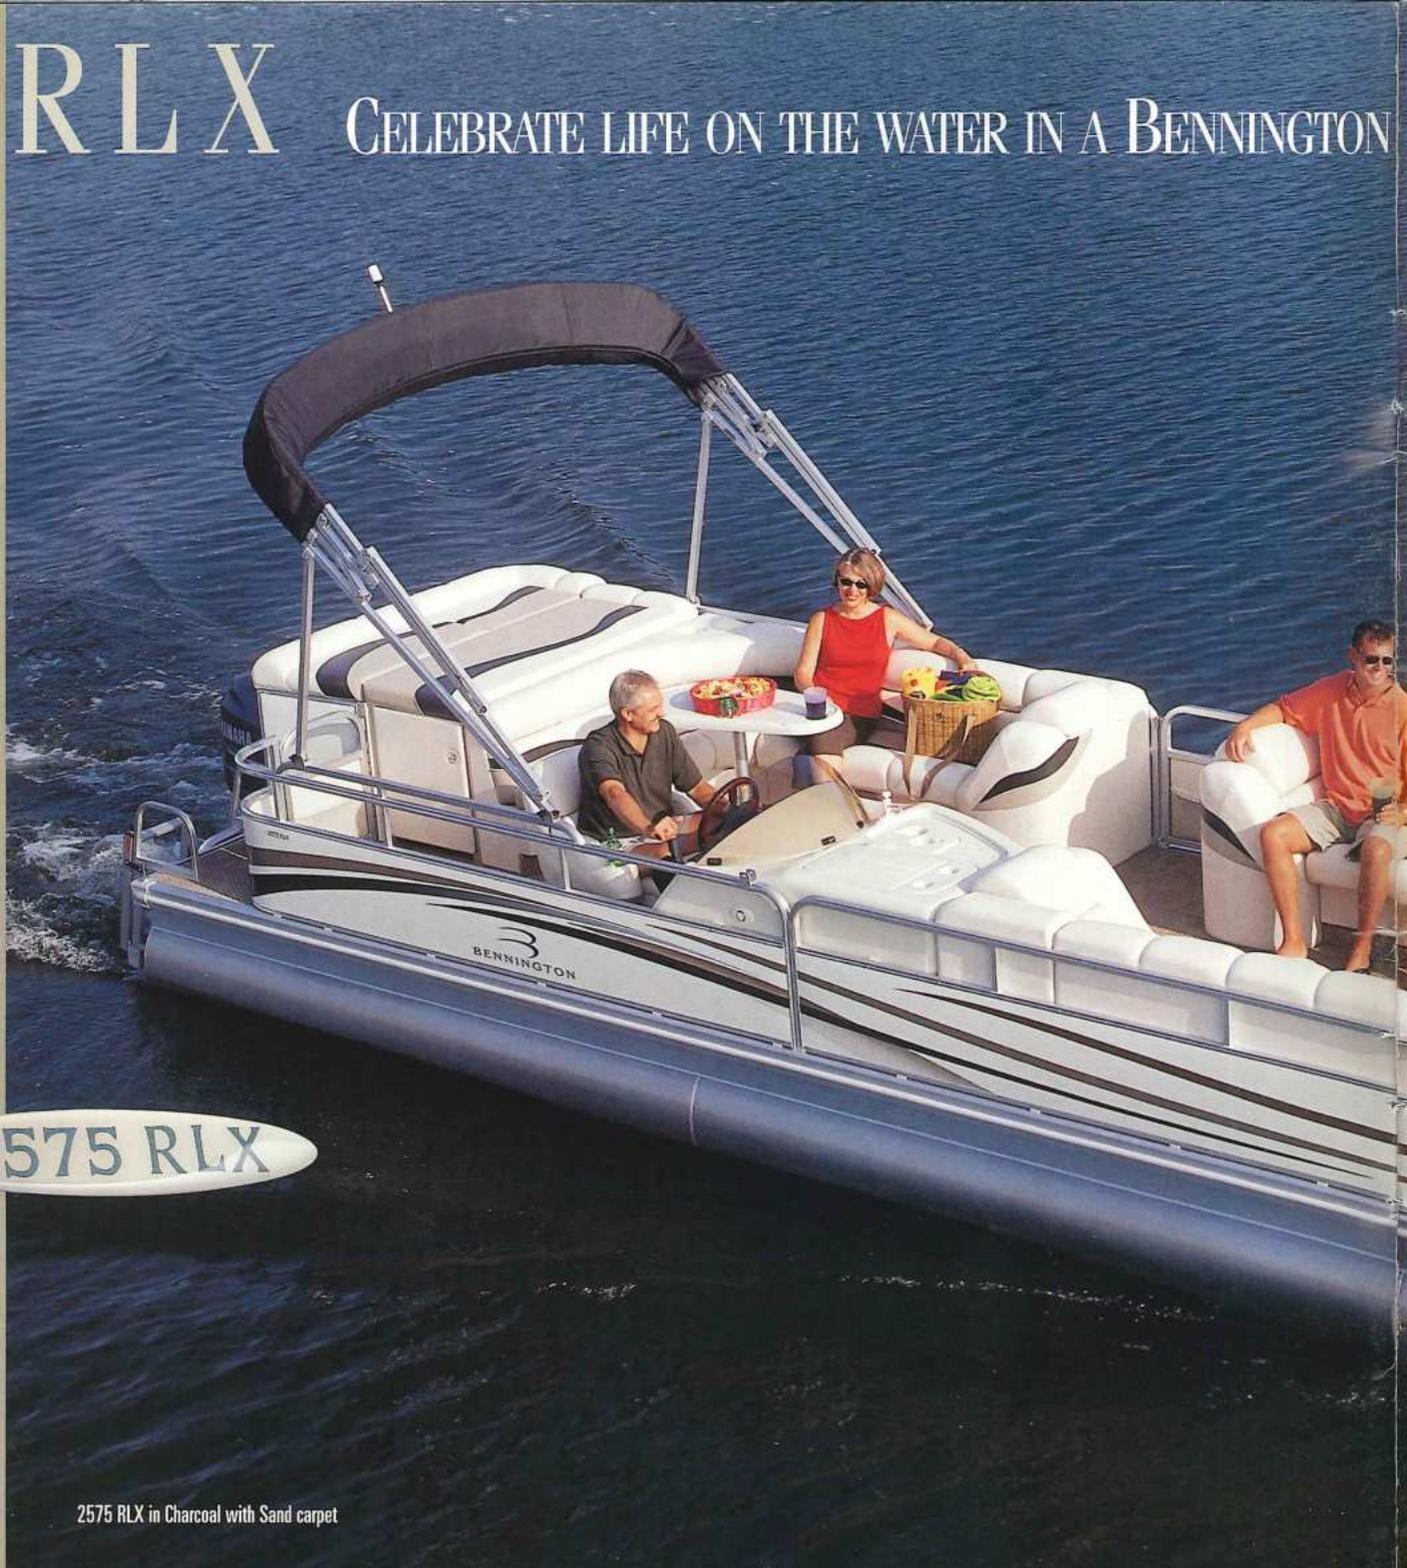

CELEBRATE LIFE ON THE WATER IN A BENNINGTON

Unique floor plan options, the latest styling innovations, and a host of standard features give you the perfect on-water experience. Our founders believed that there were consumers who wanted more in a pontoon, and in 1997 these industry veterans founded a new kind of boat company... Bennington Marine. With an uncompromising commitment to quality and attention to detail, Bennington has set new industry standards, and in the process has become the fastest growing pontoon boat builder in the country.

Our top-of-the-line 2575 RLX gives you unrivalled luxury, comfort and style.

Offered in three custom-color combinations and spectacularly appointed with wrap-around bow lounges and a long list of deluxe features, the RLX is in a class by itself.

Life on the water. It can be whatever you wish it to be when you own a Bennington.

RL SERIES

2050 RL Invite your friends for a day of cruising.
2075 RL Just four of you? Oh, come on... there's
2080 RL room for 17 in our spacious 25-foot models.
2250 RL With the radius lounge in Bennington's RL
2275 RL series boats, there's plenty of room to enjoy
2280 RL the sun and breeze as you head into a
perfect weekend afternoon.

2550 RL Our 20-foot boats are the roomiest on the
2575 RL market and feature a 38-inch fiberglass
2580 RL console with a digital depth gauge as
standard equipment. The 22 and 25-foot
models feature a one-piece, 40-inch
fiberglass console with a burl panel, depth
gauge and custom, gold-trimmed gauges.
Amenities such as an extra large, double-
hoop privacy enclosure, wrap-around bow
lounges, stern ladder* and Infinity carpeting
add up to the latest in contemporary styling
and comfort.

Bennington RL Series pontoons are
available in nine floor plans and seven
colors and are offered with options that
make this luxury boat a spectacular choice.

I/O SERIES

2275 RL I/O
2575 RL I/O
2575 FS I/O

New this year, Bennington's I/O — Inboard/Outboard — Series boats are designed for boating enthusiasts who enjoy the smooth, quiet power of stern drive engines. Bennington now offers three popular models with optional I/O power from 135 horsepower to 320 horsepower. V-6 and V-8 powered models come standard with our Performance Package and are perfect for carrying heavy loads fast. Our two-pontoon models are powered with a four-cylinder power plant that offers quiet, efficient operation. All I/O models have incredibly large privacy enclosures, generous fuel capacity and easy engine access. With our new I/O models, Bennington has once again redefined luxury.

2575 FS I/O in Wineberry with Sand carpet

Comfortable pivoting bow seats

I/O engine access and separate stern storage

- 28 oz. Infinity carpet (Sage & Sand only)
- Deluxe hurl steering wheel
- Double wide captain seat w/ or w/o pivoting base
- Heavy duty rub rail
- Ottoman
- Performance Package
- Playpen cover
- Sony CD player

PERFORMANCE PACKAGE

So you think pontoon boats aren't made for speed and performance? Bennington's Performance Package delivers speed, buoyancy and rough water performance and is available as an option on all 8 1/2-foot-wide models (excluding extended transom models). It consists of three 25-inch diameter pontoons with lifting strakes, an aluminum under-deck wave shield, a high-capacity, 35-gallon fuel tank and hydraulic steering. The Performance Package will accommodate engines up to 150 horsepower on 20-foot models, 175 horsepower on 22-foot models and 225 horsepower on 25-foot models for speeds well into the 40s*.

A Bennington pontoon boat equipped with a Performance Package offers the speed of a runabout plus the smooth ride, seating capacity and comfort of a pontoon boat. Find out firsthand why more and more experienced boaters are trading their runabouts for a Bennington.

2080 RL in Cobalt Blue with Sand carpet
Boat shown with optional performance package, pontoon lifting strakes, bow gate seat and ski tow bar

1. Underdeck Wave Shield

For smooth cruising performance at higher speeds, we recommend the aluminum underdeck wave shield. The wave shield eliminates the "surging" sensation by preventing water from hitting the cross channels. The underdeck wave shield is included in the Performance Package and optional on all 20', 22' and 25' models.

2. Pontoon Lifting Strakes

The optional pontoon lifting strakes are welded to both sides of each pontoon and provide additional lift and enhanced performance. They are available on both two and three 25" tube models. For optimum performance, pontoon lifting strakes are only recommended with 115 HP engines or above on 22' and 25' models and 90hp and above on 20' models.

* Speed may be affected by load size and weather conditions.

FS SERIES

2075 FS

Sun-splashed days and the fish are jumping.

2275 FS

Casual fishermen and avid anglers alike

2275 FSi

will appreciate the FS Series featuring

2275 CCI

large, comfortable bass seats, 22-gallon

2575 FSi

aerated livewells, in-dash fish graphs and

abundant rod storage. The extended

transoms on the FSi and CCI models

provide plenty of room for fishing anywhere

in the boat.

Even those more inclined to lounge instead

of fish will appreciate the additional deck

space and large double-hoop privacy

enclosure (FS & FSi) that becomes a

spacious sunbathing area when not in use.

After a dip in the lake, boarding is made

easy with Bennington's heavy-duty

stern-entry ladder. The FS Series

pontoons are great playgrounds for every-

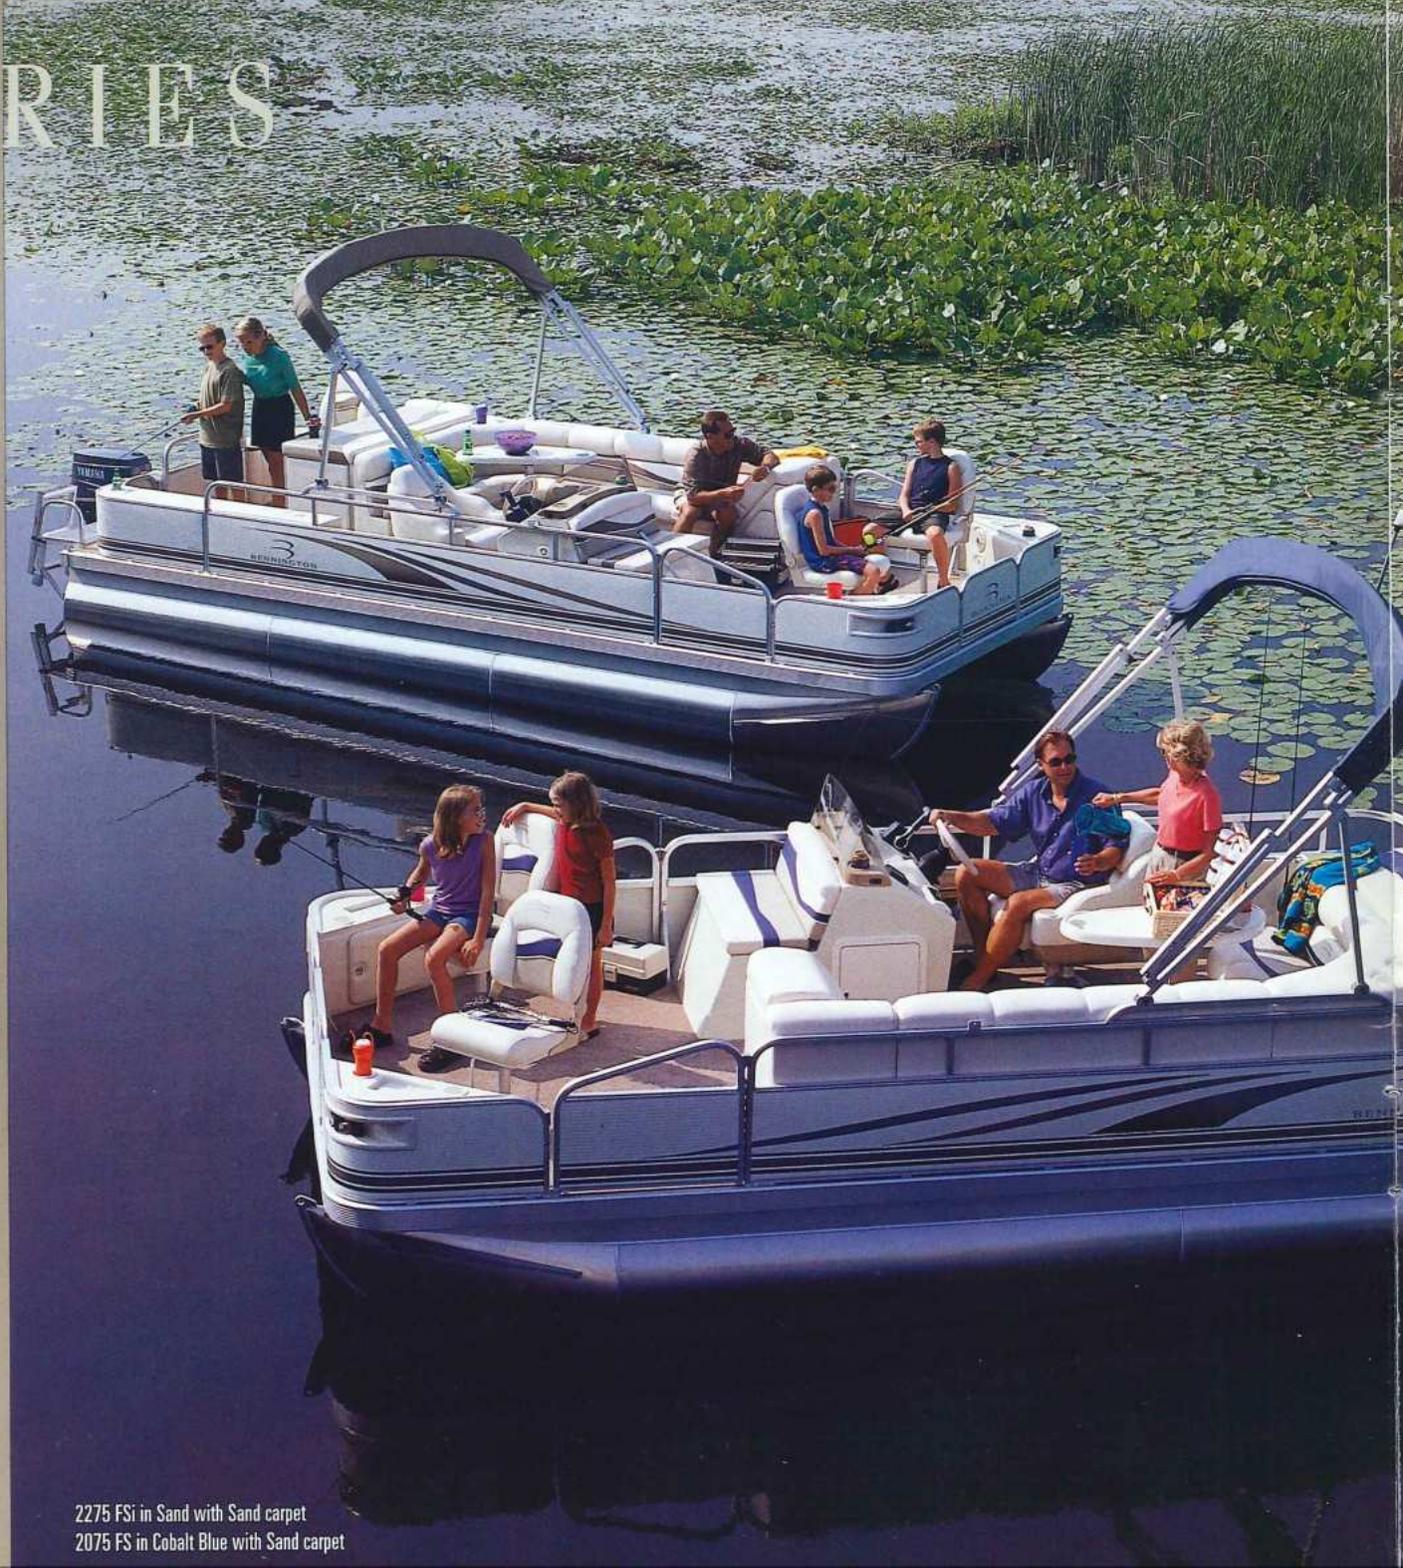

one's idea of fun.

HOW WE BUILD THE BOATS DREAMS ARE MADE OF.

Take the time to look under and around any Bennington boat... you will find that Bennington designs and builds the very best constructed pontoon boat available. The quality and attention to detail is unsurpassed. We use only proven construction techniques and the highest quality materials. Because we take no construction short-cuts, Bennington pontoons will be the most solid, quiet riding boats on the water, and they are backed by the best warranty in the industry.

AWARD WINNING PONTOONS

Pontoon and Deck Boat Magazine Shootout Winner

1999 Best Built Boat Winner

2000 Best Built Boat Fit 'N Finish Category

"Once again Bennington hit the nail on the head. Overall construction on this vessel from top to bottom was simply outstanding. No matter where we looked from the welds on the logs to the wiring under the helm, it was quite obvious that Bennington takes a lot of pride in their construction and quality control as well!"

John Barr, On-Trailer Inspector

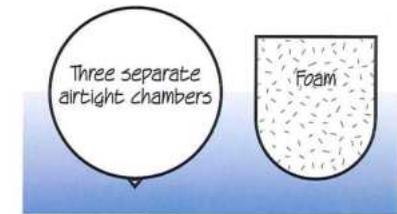

Pontoon & Deck Boat Magazine Shootout 2001

Compare decking...your choice will be Bennington.

	Bennington – 7-ply Pressure Treated Wood	Others – Aluminum
Heat	Insulates against heat; no heat build-up	Hot; excessive heat build-up
Sound	Low sound transmission; reduces noise from engines, footsteps and waves	Noisy; increases noise from engines, footsteps and waves
Deck	3/4"; more rigid deck means less racking and twisting	Thin; means more racking
Carpet Wear	Easy on carpet wear	Moisture stays in carpet and causes more rapid wear
Platform	Stable and solid; the 3/4" multiple layer plywood construction provides a strong, stable platform for securing rails, table bases, consoles, etc.	Weaker; fasteners tend to loosen easily in thin aluminum, resulting in wobbly rails, table bases, consoles, etc.
Fasteners	Our wood decks are bolted to cross channels	Aluminum decks are screwed to cross channels
Repairs	Cost effective and easy to repair	Difficult and expensive to repair
Warranty	Bennington offers lifetime coverage to repair or replace any wood deck or wood component free of charge including labor and materials	Limited

ROUND SHAPE PONTOONS

Bennington uses round shaped pontoons because they are stronger, lighter and provide more buoyancy than U-shaped pontoons.

The forming of the pontoons into a cylindrical shape greatly increases the strength of the sides of the round pontoons. Unlike U-shaped pontoons, you will see no waviness in the sides of a round pontoon. The fully welded interior bulkheads greatly increase the strength of a round pontoon (not available on most U-shaped pontoons).

Keels located on the bottom of round pontoons add strength and protect the bottom of the pontoon from shallow water damage.

Most U-shaped pontoons do not have keels.

Round pontoons are lighter. Because of the separate air-tight chambers in a round pontoon, there is no need to add extra weight by putting foam in them. Water saturated foam adds a great deal of weight to a U-shaped pontoon. Added weight means the boat will sit lower in the water and perform much less efficiently.

The 23" and 25" diameter Bennington pontoons are consistently wider than the smaller diameter U-shaped pontoons. This larger diameter will allow the boat to sit higher in the water, perform more efficiently and have a higher person capacity rating than the U-shaped pontoon.

DESIGNER UPHOLSTERY

Our customers rave about the comfort of our seating. Our secret? We use a unique, high density-foam in two compressions to provide the perfect combination of support and plush comfort. The 30 oz. expanded vinyl has excellent memory retention that resists bunching or stretching and is custom color-matched to each boat.

PRESSURE-TESTED PONTOONS

Every Bennington pontoon contains three or more separate airtight flotation chambers with fully welded bulkheads and top-mounted air vents. Each individual chamber is pressure tested to insure a water-tight, leak-free tube.

Gusset reinforcement for added seat strength

DURA-FRAME SEAT BASE

Bennington's one-piece, roto-cast molded seats are stronger and more durable than the two-piece combination plastic/wood seats. The water tracking system and properly placed drain holes keep the under seat storage areas dry and clean.

Four points of support (not two)

OUR DECK BRACKETS

Bennington's extruded (.125") deck brackets are stronger than the sheet aluminum supports. Our deck supports have four (not two) points of contact across the top of the pontoons which helps to evenly distribute the frame weight, stress and get more support closer to the engine.

Bennington stainless steel bolts Competitor's self-tapping screws

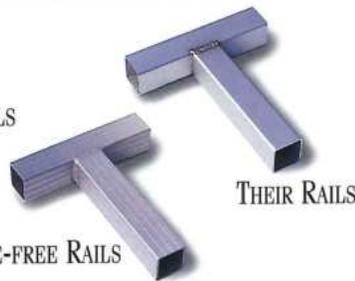

STAINLESS STEEL BOLTS

We use stainless steel bolts to secure the deck to the cross channels are stronger and have more holding power.

Bennington's 3" high, 1/4" thick cross channels are standard throughout the boat (not just a few in the stern). These heavy-duty cross channels are twice as thick as those used by most of our competitors. Designed for today's heavier, larger horsepower engines they are the main reason why Bennington pontoons provide a solid, quiet ride.

OUR RAILS

THEIR RAILS

RAISED, RATTLE-FREE RAILS

All Bennington models provide drainage and ventilation so the deck dries fast and clean. A special sealing tape on the perimeter of all Bennington rail panels ensures a quiet, rattle-free ride. Our rails are welded before anodizing (not after). Welding before anodizing results in a stronger, smoother weld that will not discolor from oxidation. Bennington rails are also welded on four sides (not two) and are 1 1/4" (not 1"); .090" thick (not .060"). The rails are anchored to the frame of the boat (not the wood deck) whenever possible. Our inside rail supports are solid (not hollow tubes) to ensure the sturdiest rails in the industry.

OUR KEELS

Full length keels strengthen the bottom of the pontoons, improve tracking and provide extra protection from shallow water damage when beaching or docking your boat.

REINFORCED BOW CHANNEL

The anodized bow trim on all Bennington pontoons is reinforced with a 1/4" (.250") thick radius bow channel to prevent sagging of the bow deck.

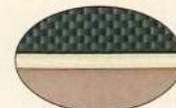

SPORT PACKAGE

Our Sport Package is available on any LX or Bennington II* model and really adds pizzazz to your boat. Choose your color from Cobalt Blue, Hunter Green, Wineberry or Charcoal. Then let the Sport Package round out the look with color-matched gauge panels, sport graphics, Mocha carpet, brushed aluminum gauges with stainless steel bezels and a simulated leather-wrapped sport wheel.

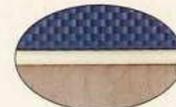

* Excludes 180 EL and ES.

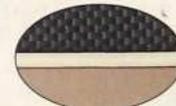

Optional on LX and Bennington II series: Sport Gauge Panel/Package shown in Wineberry, Charcoal, Cobalt Blue and Hunter Green.

While we have maximum HP capacity ratings for each boat in our lineup, we understand there are a number of engine models and sizes that will work well with pontoon boats. When smaller HP engines are being considered, we highly recommend selection of a high thrust engine model that has been specifically designed for pontoon use like Mercury's Big Foot and Yamaha's High Thrust models. These engines, available from 9.9 hp through 60 hp, are manufactured with larger gear cases and gears allowing the engines to accommodate larger propellers. Larger diameter propellers give the engine a better grip on the water, reducing the chance of ventilation, and therefore providing superior performance over a non-high thrust model. Most engines above 60hp are well suited for pontoons due to their larger gear cases and propeller selection.

Only Bennington gives all of this as standard
