FINALLY A SYSTEM YOU CAN TRUST.

iN-Command™ by JENSEN® embraces the next generation of controls for your Keystone RV by acting as the central hub of operations and puts you at the helm using your preferred smart device. But how does this all-encompassing system work? What, exactly, does it monitor and control? Let's take a closer look at iN-Command piece by piece.

The Display Commander is your primary point of contact with iN-Command. All of the switches and monitoring panels that have cluttered up interior walls in the past are integrated into this one sleek, touch screen monitor. What really makes the Display Commander stand out, however, is that it can be controlled remotely with a smart device using the free JENSEN iN-Command mobile app. This app performs all of the same functions as the Display Commander, but from the convenience of your mobile device.

- ✓ **Never lose your controller**
- ✓ **Multiple Users**
- ✓ **When you have your phone, you're iN-Command**
