

NOT YOUR ORDINARY TOY HAULER

WEEKEND WARRIOR believes in building a world-class toy hauler. Many companies seek only the least expensive trailer components. We believe for not a lot more, you usually get a better, longer lasting component. This translates into a far more valuable trailer and a better RV experience.

WEEKEND WARRIOR - Quality Is in Our DNA

When you take a closer look, you will see quality features that really make the difference:

• **MAX-RATED TIRES** - Tires should always have a high max rating. Many companies do not go through the extra expense. There is a sense of security knowing that in the event of a flat tire, the other tires will have less stress/fatigue at that crucial point. Only metal valve stems are used, because rubber ones rot and will cause a flat tire.

• **AERO-DYNAMIC FIBERGLASS CAP** - Improved aerodynamics utilizing an strategically engineered front cap provides superior towing experience and less "buffeting" in cross winds.

• **AERO GAS BOTTLE COVER** - We determined that using up to 3' standard BBQ bottles would make it easier for you to get propane (exchange bottles), then we lowered them into the main frame and designed a low profile shroud.

• **EQUA-FLEX SUSPENSION EQUALIZER*** - This patented system absorbs road shock, which can cause significant damage to chassis and body. Instead of transferring the "jolt" to the RV body, the equa-flex system diffuses vibration. Provides a much smoother ride vs. traditional leaf-spring only designs.

• **ELECTRIC & MAGNETIC BRAKES** - Extra safety is provided by running brake wiring through the axle tube vs. Being exposed like most trailers. In addition, Omega RV utilizes a "loop" design so all brakes receive equal braking pressure (this means more precision braking at all corners). This reduces uneven wear or the dreaded "flat spot" on one of the tires.

• **BEEFED UP CHASSIS** - The Warrior foundation begins with a rugged I-beam, main-rail design. We integrate a steel grid in between the main rails and cross members. Durable flooring made of 5/8" exterior grade plywood attached in over 100 places!

Our design/manufacturing team has decades of experience in quality building. That is our commitment to you for your next chapter in RV living. We call our products "freedom machines." Enjoy your freedom.
