## SNEAK PEEK

**WINNEBAGO**

## In a Class by Itself

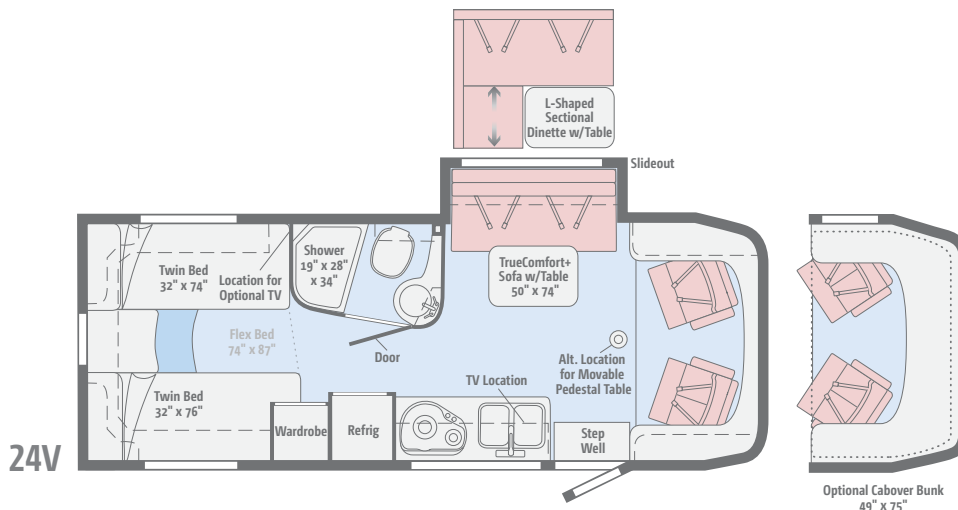

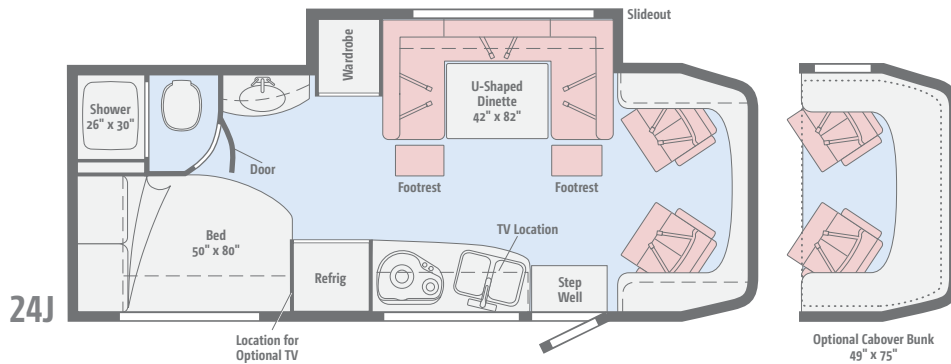

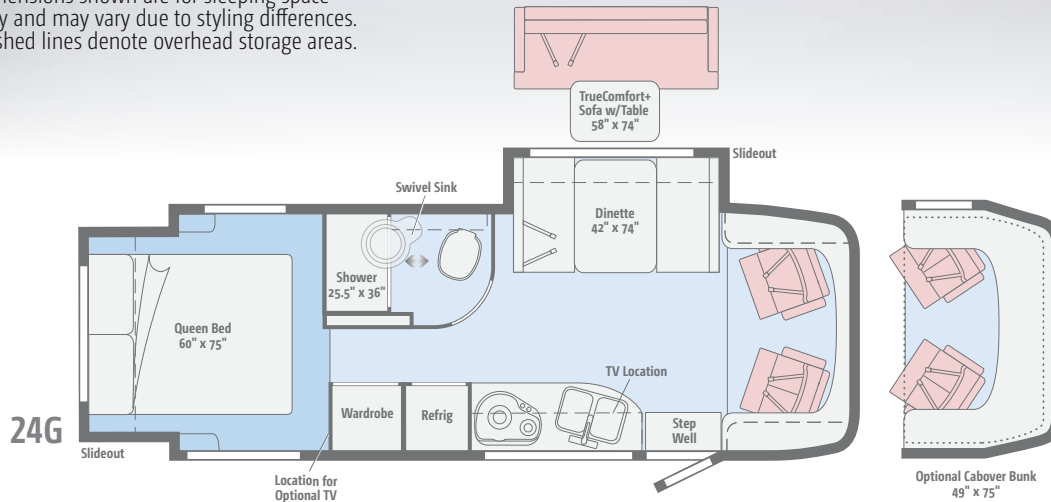

When you want the mobility of a Class C coach with amenities, look no further than the Winnebago® View®. It takes full advantage of the Sprinter Chassis platform to present many of the finest motorhome features in a compact footprint. The 24G has been completely redesigned with a more spacious lounge that gives you the option of a large dinette or comfortable queen size sofa/sleeper. If you want something with a little more sleeping versatility, select the 24V with the Flex Bed system that easily converts between a queen bed or two twin beds. And if size is what matters, the U-shaped dinette in the 24J opens up to a massive 80" sleeping space. When it comes to RV lifestyle, the right look and a comfortable interior make all the difference. See what you've been missing in the Winnebago View.

\* The 35B uses separate black and gray tanks for each bathroom \*\* The 35F uses separate black tanks for each bathroom

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please contact your dealer for further information.
- Floorplans feature a wide-body design - over 96" In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- The load capacity of your motorhome is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motorhome.
- Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR, and GCWR, as well as adequate trailer brakes. Please refer to the Operator's Manual of your vehicle for further towing information.
