

2447

The XLT Flyer is an affordable, family-friendly, all-aluminum mini camper that is lightweight, easy to use and extremely versatile. Starting at just 850 lbs (depending on options), the size of your tow vehicle will no longer limit your camping adventures.

MAX

The MAX Flyer adds the convenience of a slideout kitchenette that includes a 2-Burner LP Stove and a 12V Refrigerator. Set up is easy and hassle-free in just seconds. There's even a removable L-Shape countertop that provides a convenient prep station with a handy exterior mounted 120V recept.

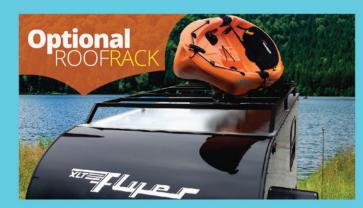

XLT+

The XLT Flyer PLUS is our entry level micro lite toy hauler that has the same versatility as the original XLT Flyer with the addition of the rear ramp door. Big enough to transport motorcycles or a full-size ATV now you can easily bring your toys on the adventure too!

MAX+

The MAX Flyer PLUS allows you to have it all! A micro lite toy hauler with a slideout kitchenette just took the word versatility to a whole new level. Add the optional Tip-Out Bed & Removable Dinette Table and you won't believe the amount of room found in this compact and easy to tow camper.

Two-Tone Exterior Sidewall

The roof mounted A/C with the standard heat strip doesn't just keep you cool on those hot summer nights, it helps extend your camping season handling those cold nights as well. At just 8" tall it's the lowest profile roof mount A/C available and delivers 9200BTU of arctic cold air and an unbelievable 6000BTU of heat.

With the optional Add-A-Room Tent, the Flyer converts into a two room suite with a separate sleeping area for the kids. The tent can also double as a screened porch. Evenings are comfortable with the addition of the optional roof mount A/C that's powerful enough to handle the tent and trailer on those hot or cold evenings!

Off-Road Tires are a great option for the Flyer, not only does it give you a little more ground clearance, but the ground grabbing off-road tread design looks great on or off the path. The large LT235/75R15 off-road tires give the Flyer a powerful stance that's ready to explore the deep woods, so don't limit yourself to the paved roads on your next adventure let the Flyer lead the way!

The MaxxFan® Deluxe is the only complete RV ventilation system that incorporates a vent, fan and rain shield in a single all-in-one unit, eliminating the need for any additional covers. The vent is thermostatically controlled so you remain comfortable throughout the evening and even comes with a handheld remote control for easy operation.

3 YEAR WARRANTY 3/1 YEAR TRANSFERRABLE STRUCTURAL WARRANTY

At inTech RV we believe in providing a warranty on the trailers we build, not the customers that purchase them. So if you ever find yourself in a situation where you are selling your trailer before your warranty period has expired, you can sell your trailer with confidence. Any remaining time on your warranty can be transferred to the new owner at no cost and by simply contacting inTech RV within thirty days of the sale and registering the transfer with inTech RV. This translates into a higher resale value because the new owner can purchase with the same confidence that you did!
