26. Vented Attic

CLIMATECH® COLD WEATHER ALL SEASONS INSULATION PACKAGE

- Underbelly has R-38 reflective atto-foil insulation + R-7 fiberglass under each holding tank. Also included is a 12-volt tank heater for each of the holding tanks
- The floor has R-38 reflective astro-foil insulation + R-7 fiberglass insulation
- The ceiling, front wall and rear wall have R-38 reflective astro-foil insulation + two layers of R-7 fiberglass insulation
- The side walls, three sides of the slide-out, the raised upper deck of all fifth wheels and all raised bunk beds are vacuum-bonded, aluminum construction with R-10 high-density block foam insulation
- The slide-out floor also has a layer of R-38 reflective astro-foil insulation on top of 1.5" plywood decking
- On all fifth wheels, the outside storage compartments have an actual heat duct blowing hot air from the furnace directly into the storage compartment
- Every Wildcat Maxx comes with a vented attic to allow moisture to escape in the winter and heat to escape in the summer
- Every Wildcat Maxx comes standard with a 35,000 BTU furnace

(It is important to remember that astro-foil insulation has an actual "R" value of 0. It is a calculated, reflective "R" value of 38 at an ambient temperature of 80 degrees Fahrenheit.)

HEAVY-DUTY ALUMINUM FRAMING

We use heavier tubing than most of our competition. Our vacuum-bonded, 2" side walls are fully insulated with R-10 Block Foam insulation and each opening is 100% framed on all 4 sides with welded aluminum

DOUBLE INSULATED CEILING WITH REFLECTIVE FOIL, STANDARD

Our products are designed with the latest insulation products and are engineered to withstand extreme environments. Insulation and reflective foil is added above the protective water barriers on the bottom of each unit. We also add vented areas in the ductwork to heat the underbelly of each unit.

R-38 RATING IN CEILING AND FLOORS

Spaced Age Astro-Foil Insulation™
Our system has a calculated reflective R-Value of 38 at an ambient temperature of 80° Fahrenheit and can double your heating and cooling efficiencies.

PRE-DELIVERY INSPECTION FACILITY

20,000 square feet of quality assurance. The bare essentials for a premium product. This state-of-the-art facility gives immediate daily feedback to production for quality assurance in every unit built.

Forest River, Inc. encourages our customers to purchase their Forest River products from a local dealership whenever possible for the following reasons:

- 1) Forest River, Inc. dealers are independently owned and operated businesses so priority service and scheduling is at their discretion and is often provided to customers that purchased their unit at that dealership.
- 2) Purchasing locally allows customers to establish meaningful relationships with a dealer, enhancing the RV experience through assistance with product questions, user tips or RV regulations for your state or country, and much more!
- 3) Canadian customers must meet requirements to bring an RV purchased out of the country to their home. These requirements may involve additional inspections and certifications, taxes and fees. Your local Canadian Dealer is a professional at meeting these requirements.
- 4) Scheduling timely warranty repairs and adjustments through a local dealership provides far greater flexibility and convenience to you, the customer!

It is the goal of Forest River, Inc. that all of our RV owners fully enjoy the RV experience and that customer satisfaction meets or exceeds their expectations!

24/7 EMERGENCY ROADSIDE ASSISTANCE

For a worry-free ownership experience

Forest River includes one

year of Coach-Net RV Technical & Roadside Assistance with each RV purchase. Whether new to the RV lifestyle or an experienced RV enthusiast, Forest River owners have 24/7 access to technical, operational and emergency road service coverage throughout the US & Canada.

Coach-Net's fast, dependable service is just a phone call away.

Coach-Net[®]
RV Technical & Roadside Assistance

Specification Definitions

GVWR (Gross Vehicle Weight Rating) - is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

GAWR (Gross Axle Weight Rating) - is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles.

UVW (Unloaded Vehicle Weight)™ - is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

*Estimated average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** - is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity.

** Estimated average based on standard build optional equipment

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities.

The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.
