

# PALOMINO

*TENT CAMPERS*

PALOMINO

## Tent Campers

*Palomino tent campers have your comfort in mind. The indoor/outdoor cooktop gives you flexible cooking options while the 19 gallon fresh water tank gives you plenty of water for drinking or cleanup. And even if the temperature drops at night, the 20,000 BTU furnace will keep you comfortable and warm.*

PALOMINO

## Comfortable Sleeping for All

*Practical and comfortable. Sleep should be peaceful, even on the colder nights. The Palomino bunks have large, comfortable heated mattresses and thermo-foil bed ends to keep the heat in and the cold out. The dinette cushions are reversible so any food or drink spills can be easily cleaned off the reverse, vinyl side.*

**CONSTRUCTION MATTERS.** *Each Palomino tent camper comes with a one-piece Filon fiberglass roof, which keeps the rain out, and is pre-framed for the optional roof air conditioner. The upgraded 5-piece sectionalized tenting makes repairing a section of the screen easier than replacing the entire camper's screens.*

PALOMINO TENT CAMPERS

## PALOMINO

# A-Frame Campers

*The Palomino A-Frame series is a new spin on an old tent camper design. The solid, durable hard side walls set up and fold down much faster than traditional tent campers, allowing you to spend more time enjoying your vacation. And when vacation is over, it tows smoothly, thanks to the standard torsion axle, and stores easily in your garage.*

### Specification Definitions

**GVWR (Gross Vehicle Weight Rating)** - is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

**GAWR (Gross Axle Weight Rating)** - is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles.

**UVW (Unloaded Vehicle Weight)\*** - is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

\*Estimated average based on standard build optional equipment.

**CCC (Cargo Carrying Capacity)\*\*** - is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity.

\*\*Estimated average based on standard build optional equipment

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities.

The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.

### SHINE BAY APPROVED

Each of units goes through a lengthy 30 point inspection process to guarantee complete satisfaction upon arrival to the dealer. We take the time to check everything from seals to electrical shortages.

### PRE-DELIVERY INSPECTION FACILITY

20,000 square feet of quality assurance. The bare essentials for a premium product. This state-of-the-art facility gives immediate daily feedback to production for quality assurance in every unit built.
