

*NORTHSTAR*  <sup>®</sup>

**QUALITY**  
SINCE 1961

## About Us

### Our History of Excellence

Northstar Campers has been calling Waterloo, Iowa home since 1955 when the Willett family began manufacturing truck campers. The company was founded by Ralph (Tex) Willett who along with his son Robert (Chuck), ran the company under the name of Texson Campers. The father/son duo helped launch the company, building a reputation unmatched in the industry and creating a strong foundation for Chuck's son, Rex. Rex took over the company in the 1980s, operating under the Northstar Campers name, which continues to this day.

We've been selling our campers to dealers since 1961, and Northstar's campers are sold across the world to help families enjoy the outdoors and camping. From our facility at the corner of Leverssee Road and Airline Highway in Cedar Falls, we've remained committed to improving our truck campers using proven construction techniques while integrating modern materials. This allows our product to continue to stay ahead of the industry, both in quality and longevity.

## Quality that Lasts

Northstar Campers manufactures truck campers that you can depend on for a long time. Our dedication to quality has allowed us to continue "Shining Above the Rest" and many of our campers are still out on the road decades later. We believe our truck campers are the perfect thing for active travelers and campers, and we're here to help you for every mile on the road. Our customers are the most important thing to us, and we take great pride in not only manufacturing the best truck campers you can find, but in helping you maintain it for years while we build a relationship with you based on trust and quality.

# Vista

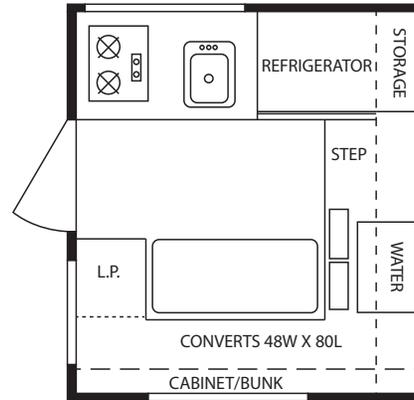

Quality Since 1961

Our newest addition to the Northstar family is the cab-less VISTA. Great storage and expandable dinette bed without the resistance of a cabover.

## Cassette Toilets Are Truck Camper Perfect!

So...you like to get off the grid?

The cassette is a built in toilet system with it's own water tank supply and water-pump. It has a waste capacity of 5 gallons and easily just slides out to dump just about anywhere. You can fill the 4 gallon fresh tank with antifreeze or windshield washer fluid for cold weather camping and never worry about freezing! No wrestling with a sewer hose or paying to dump. When camping with the camper off the truck you can use the toilet as much as you want with no worry of reloading the camper to dump your waste-tank.

Totally off Grid!
