## *Start Your Adventure*

OPUS® is a revolutionary folding camper with endless possibilities for adventure! It is ultra-lightweight and extremely easy to tow, even with a small car. Its low profile allows for all round visibility, so you can hitch up easily and drive away with total confidence. Although it's small and easy to manoeuvre it is also strong, rugged and very versatile. With two reinforced lids and a universal racking system OPUS® is the perfect load-carrying platform. Carry boats, carry bikes, carry kites, carry kayaks and more!

Our latest innovation, the AIR OPUS® uses AIR pole technology to inflate the tent in 90 seconds, making pitching up so quick and easy you'll want to go camping every week! The OPUS® can comfortably sleep up to 6 and the optional AIR awning with single point inflation provides further accommodation for 4 along with a large additional living space.

At OPUS® we don't think you should have to choose between practicality and comfort, so we match all of our functionalities with pure luxury. The true definition of 'glamping', the OPUS® allows you to bring the comforts of home with you without compromising that camping feeling. Soft double beds for the perfect nights' sleep; Plush leatherette seating for a comfortable place to relax; a stainless steel sink with running water and a kitchenette with a gas stove top and refrigerator... the list goes on and on! Plus our extensive range of options mean that you can design your own OPUS® to suit your camping style perfectly.

OPUS® provides you with freedom. The freedom to roam, the freedom to discover, the freedom to travel... wherever you want, whenever you want. Create unforgettable memories with family and friends. Explore new places or old favorites, roam the great outdoors experiencing the best OPUS® has to offer. Use it as a base camp for your favorite outdoor pursuits or a place to unwind and relax in. Our unique folding camper is adaptable, yet always providing the comfort and luxury that you deserve.

*For Fun-Loving, Trail-Blazing,  
Thrill-Seekers ... Everywhere*

# Camping, Your Way...

At OPUS® we understand that everyone's camping experience is unique which is why we've developed our two models alongside a range of options and packages so that you can build a unique OPUS®, perfectly suited for you.

TOUGH  
LUXURY

## OPUS®

Our original folding camper, this is our lightest model. It can be towed by most family SUVs, whilst still being incredibly strong to haul all your gear and with all the space and features for a true glamping experience for all the family.

See page 5 for more information

## OPUS® Off-Road

Our newest model, the OPUS® Off-Road features some serious upgrades to make the OPUS® more rugged, adventure-ready and perfectly suited to follow you on your next Off-Road experience.

OPUS®

*... The Original*

The OPUS® has been designed for use in all seasons, come rain or shine, you'll have the perfect base to relax in after a day full of adventures! The external aluminium frame of the OPUS® has huge weight saving benefits, yet provides rigidity and strength. The Poly-Cotton Canvas is heavy duty and tested to withstand the elements. The inset polycarbonate panels are fully insulated to maximise internal warmth for cooler nights!

The OPUS® has an A-Frame chassis which complies with NHTSA and NFPA standards and regulations. The overall weight is just 1577lbs making it super-lightweight and meaning it can be towed by most 6-cylinder SUVs. Although it's light, the OPUS is also very strong meaning you carry up to 1925lbs of gear including up to 1000lbs on the roof with space for up to 6 bikes!

Once you've reached your destination, the OPUS® has hook-ups for shore-power and city water for on-site camping, as well as a 12v water pump, water carrier holders and optional leisure battery if you're going to be off-grid for the weekend.

The camper is electrically braked and comes complete with 7-pin electrics for easy hook up to your tow vehicle which charges your leisure battery and will even keep your fridge cool whilst towing! The precision engineering, lightweight design and compact travel mode make the OPUS® super easy to tow, with all-round visibility and excellent stabilization; you'll hardly know it's back there!

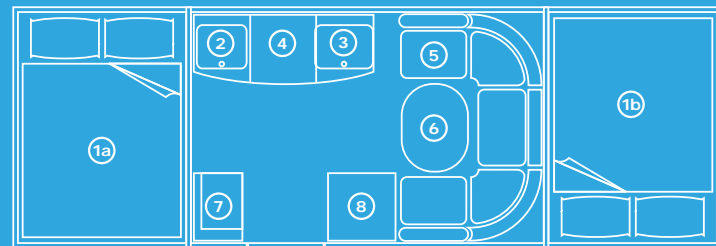

# OPUS® ...The Original

Step inside our OPUS® Original and prepare to be amazed by the space available. The interior created by our in-house design team is functional, accessible and luxurious. Finished to the highest quality, the OPUS® offers everything you need in abundance; a stylish kitchenette with a 2-burner gas stove, electric sink, 2-way refrigerator\*, microwave\* and workspace; a comfortable seating and dining area to enjoy your meal and unwind; Sleeping for up to 6 people with electric heating and optional bedroom privacy curtains; and ample storage for you and your family.

If you need a little more space you can add our large annexe (see page 9). The true definition of glamping, the OPUS® allows your to bring the comforts of home with you, without compromising that camping feeling.

The 8ft ceiling height provides plenty of headroom and a real sense of space. The signature skylights let light flood in during the day and can be covered up at night or left open for star-gazing!

# OPUS® *Off-Road*

The OPUS® Off-Road chassis has received a serious upgrade to prepare it for all terrains. We've beefed up the suspension, installing heavy duty coil springs and dual shock absorbers to take a battering. To prepare for uneven terrains, we've removed the axle and angled the rear of the trailer to provide an impressive 12.4" ground clearance, making the OPUS® Off-Road your perfect over-landing companion. The OPUS® Off-Road comes with off-road tires as standard, including the spare wheel and the super cool articulating hitch with 360° mobility is just the icing on the cake!

Even with these upgrades, the weight of the OPUS® Off-Road remains incredibly manageable at just 2870lbs. Add roof bars to carry your toys and gear or alternatively choose our new side-pivoting cargo rack, which can hold an impressive 750lbs and simply folds over the top of your OPUS® when in use, with the help of gas struts.

The OPUS® Off-Road has a substantial battery life; the double 100ah deep cycle marine batteries powering your camper for up to 5 days. Add solar hook-ups for more power or simply take your camper for a spin to re-charge the batteries through your tow vehicle.

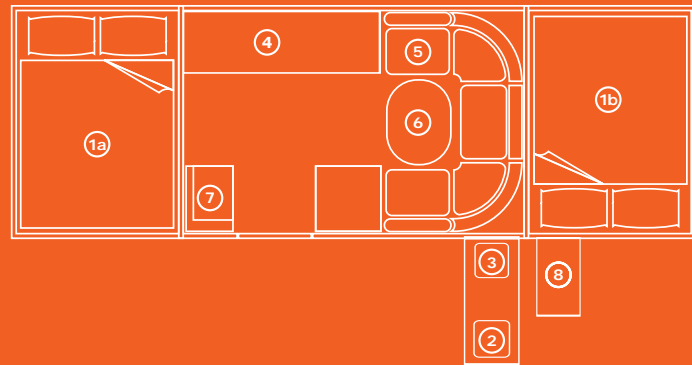

# OPUS® Off-Road

Another exciting new feature of the OPUS® Off-Road is the slide-out kitchen meaning you never have to miss a moment of fresh air on your trip. By moving the kitchen outside, we've been able to build in an impressive 4-burner gas stove so you can even cook for your neighbours too! The larger refrigerator is stowed in the powered front storage box and slides out alongside the kitchen for easy access. Worried about cooking in the elements? Our OPUS® Annexe provides you with complete cover come rain or shine (see page 9).

So that you can get the most of your off-road adventure, the OPUS® Off-Road comes with a 40 gallon capacity on-board water system with two on-demand 12v electric pumps for use with the kitchen sink or the new outside shower.

The interior still features our comfortable club lounge dining area and sleeping for up to 6 people, making the OPUS® Off-Road an real feeling of tough luxury!

# **AIR OPUS**® *Inflating Camper*

Your vacation time is precious and should be spent doing the things you love, with the people you love. That's why we developed our multi-award winning AIR OPUS® inflating tent system for a fast and effortless set-up to get you hiking, kayaking, climbing, barbecuing, laughing faster and longer.

At only 5 minutes from packed-down to fully pitched, the AIR OPUS® means you can take your camper for even the shortest of trips. The fitted 12v electric pump inflates the tent in under 2 minutes at the touch of a button whilst you're free to stabilize the trailer and set up the rest of camp. The AIR technology also aids in a speedy pack down, with quick release valves deflating the tent in seconds meaning there is always time for one last adventure.

We use advanced triple layer technology in our AIR tubes to create the most durable product on the market; to prove it's toughness, we tested the AIR OPUS® with no less than a helicopter for wind, a fire truck for water and a baseball bat for hardness! Visit our website to watch how effortlessly the AIR OPUS® handles all that we throw at it: [www.opuscamper.com](http://www.opuscamper.com)

The AIR OPUS® is compatible with both the OPUS® and the OPUS® Off-Road models, available as an optional upgrade from our traditional aluminum pole system.

- AIR OPUS® Inflating Tent Upgrade: \$2499

*Inflates at the touch of a button...*

# Awnings - The need for space!

The OPUS® Full Awning provides a huge extra living area for you to enjoy. It is custom made and is designed to compliment the shape and style of the OPUS® itself. The full awning means that you will always have the option of cooking undercover should the weather not be playing ball, and also doubles up as a sun awning for shade as the sides can be fully opened up.

We also offer the AIR OPUS® Full Awning, employing the AIR OPUS® tent inflation technology to dramatically reduce setup time when traveling as a large party. Incorporating fixed bed ends featuring both roof and side windows and a larger internal floor area than our standard pole awning, our new air version will marvel spectators at any campsite!\*

We understand that both freedom and flexibility are important which is why we've designed the OPUS® and Awning with flexible configurations ensuring the camper meets your group's needs. See our configurations below:

- Full Awning (Manual) : \$1499
- AIR OPUS® Full Awning : \$1995

8 berth with awning

10 berth with awning

\* Please note that the AIR OPUS® Full Awning is only compatible with the AIR OPUS® tent. The Manual Awning is only available with our manual aluminum-poled tent.

**2** YEAR WARRANTY  
ON AIR TUBE TECHNOLOGY

*Sides open up for more ventilation*

*Cook under cover with the OPUS Off-Road*

# Construction

Our **AIR OPUS®** campers are designed and manufactured specifically to ensure maximum strength, longevity and ease of use whilst keeping overall weight to a minimum. The details below demonstrate the technical construction methods and highlight all aspects of our unique award winning design.

## ALUMINIUM DIBOND WALLS

The external and internal walls of the AIR OPUS are constructed from Aluminium Dibond. This consists of two aluminium panels, separated by a Polyethylene core; providing a strong and lightweight outer shell.

## POLYSTYRENE INSULATION

A 20mm thick sheet of Polystyrene sits between the internal and external Aluminium Dibond walls to provide insulation.

## WATER PROOFED 10-PLY FLOOR

Built using 10-ply sheeting, with a water proofed layer to the bottom and a dark wood veneer to the top. This is then topped and sealed with industrial strength vinyl flooring.

## POWDER-COATED ALUMINIUM FRAME

The frame is constructed using specially cast and welded aluminium. This helps keep our camper light and easy to tow and move, while ensuring maximum strength. The aluminium is then finished with a high quality powder coat to ensure longevity.

## HIGH STRENGTH BONDING

Panels, frames and flooring are secured using a combination of screws, aluminium rivets and high strength bonding agent before being sealed with silicone.

## WATER TIGHT FINNED SEALS

When the lids are closed and clamped down they are sealed tight with finned rubber seals for ultimate protection from water ingress.

## PRESSURISED GAS SPRINGS

Highly pressurised gas springs are fitted to the lids to ensure easy set up, with just one person required to unfold the lids.
