

VACATIONER

2019 CLASS A GAS

HOLIDAY RAMBLER®

holidayrambler.com

HR
HOLIDAY RAMBLER
**Make
Everyday
a Holiday**

The 2019 Vacationer was designed for adventurers who want a luxury resort experience without the membership, the neighbors, or the restricted views. It's a Class A Gas that delivers on first-class ideals with five meticulously laid out floorplans that provide full-scale luxury from front to back. So, get ready to enjoy your next vacation with all-new interior and exterior enhancements, an automotive-inspired cockpit with dual monitors, new paint colors, and more.

But, it doesn't stop there. Allowing owners to experience the outdoors from the comfort of their coach, the Vacationer Extended Living Edition (ELE) features a rear patio unit that folds down and snaps into place as easy as 1-2-3. Available on the 36FP floorplan, the ELE includes an exterior entertainment center, lavy conveniently located off the patio, and a kitchenette—all accessible through a MORryde® Zero-G rear door.

VACATIONER

2019 CLASS A GAS

You want every single advantage when it come to your RV. So, just to be safe we're giving you 21.

Each of these 21 advantages have been engineered to deliver superior reliability, durability, and most of all, customer satisfaction.

Riding on Confidence

At Holiday Rambler we don't settle for anything less than the best, and neither should you.

That's why every motorhome features industry-leading materials and construction. You'll also find the ultimate in RV convenience and strength, like our auto hydraulic leveling system,

Vacu-Bond™ construction, Dryseal™ edge coating, and much more — all coming standard to elevate your travels.

1. Power Platform™ (Gas Motorhomes)

Designed to deliver the best in storage, strength, balance and control, the exclusive Power Platform provides a significant enhancement to the Ford® drivetrain.

2. Auto Hydraulic Leveling System

More reliable than electric leveling jacks, our automatic hydraulic leveling system is reliable, durable and easy to use. The operating procedure is clean and easy, the results are smooth, simple leveling at the push of a button.

3. Powerlock System™

(Interlocking Floors, Walls, and Ceiling)

REV's interlocking aluminum extrusion wall-joint system integrates floor, sidewall, and roof assembly into one locked-together overall structure for long-term performance and durability.

4. Powerframe System™

(Precision-Welded Aluminum Walls, Floor, and Roof Structures)

Our wall, floor, and roof frames are designed and engineered to fit precisely with interlocking extrusions on the steel-reinforced bridge structure. No "hammer-it-to-fit" stick and frame construction here.

5. Vacu-Bond™ Construction

Vacuum-bonded assemblies combine industry-leading materials and construction for a straight and flat integrated wall that's better suited to the rigors of the road. It applies up to 415,000-pounds of vacuum pressure to our already strong welded-aluminum sidewall frame, bead-foam panel insulation, Tuff-Coat fiberglass skin, and inner wall materials for over 30 minutes — far exceeding industry standards.

6. Solid Bead-Foam Engineered Fit Insulation™

In some RVs, you may find air holes in the insulation. Not in a REV RV. Using exact measurements, bead-foam is placed between every structural support to eliminate any gaps and provide insulation from both exterior temperature and noise.

7. Dryseal™ Edge Coating

This water-wicking coating is applied to every edge of the walls and windows for long-lasting durability. It helps to seal out moisture, prevent delamination, swelling, and mold.

8. Tuff-Coat Fiberglass Walls

REV RV seeks to use the highest quality exterior fiberglass on our Class A gas and Class A diesel products. The impressive tuff-coat fiberglass skin is extremely weather resistant and UV resistant. Most importantly, there is no wood substrate on the exterior of the REV Class A products. Delamination is a major concern for manufacturers using the composite or wood backer in their walls. Not at REV RV, our exterior skin has no composite and no wood, just the fiberglass.

9. Tuff-Ply Engineered Vinyl Roofing

As the name implies, this "Tuff-Ply" or Thermoplastic Poly Olefin is as tough as it comes and is very low maintenance. Tuff-Ply is flexible, pliable and easily conforms with the roofline radius with little to no stress at the awning rail connection seam. Tuff-Ply is a clean, non-streaking, non-chalking engineered vinyl material that is easy to maintain.

10. Tuff-PEX™ Plumbing System

It's a complete system of flexible, yet durable, Oetiker tubing, fittings, and stainless-steel rings — all with sub-zero ratings. Colors of red for hot and blue for cold make servicing simple.

11. Tapered Slideout Box Tops

Our slideouts include a tapered roofline that directs water away from the RV to provide an additional level of moisture protection. There are also multiple bead-seals, as well as our debris awning protection.

12. Seamless Metallic Slide Room Underbelly

What's underneath is just as important as what's on top. Our metallic slide bottom goes above the standard wood bottom for protection against the elements, and adds yet another level of durability.

13. Roto-Cast Molded Luggage Bays

Instead of the industry-standard plywood, these molded bays are more durable, look great, and can be washed with a hose.

14. Dedicated Full-Length Metallic A/C Ducting

Instead of cut-out foam channels, REV provides insulated A/C ducting that runs the entire length of your motorhome with carefully placed outlets in the most occupied places to assure cool comfort.

15. Sure-Glide Flush Floor Aluminum Slide Transition Ramp

Pinewood ramps that absorb moisture, crack and rot are the industry standard. Not here! Our aluminum ramps will stay straight, extend and retract easily, and will provide you with years of trouble-free operation.

16. Automotive Inspired Bonded Windshield

REV RV's bonded windshields surpass the standard "floating" windshield in durability. The entire perimeter of glass is bonded to a frame that provides more support and is much more conducive to the demands of the road.

17. Bus-Style Cargo Doors

We far exceed the industry standards of exposed seals and hinges with a more durable design taken from our luxury motorcoaches.

18. Premium Full-Body Paint

Just like the cars, trucks, motorcycles and most any other automotive product produced today, our motorhomes receive the same premium painted protection on the exterior. Unlike the cars of today, our motorhomes are typically more than just one color. The REV RV family of painted motorhomes receive up to four different colors and as many as two separate coats of clear. Our REV RV family of Class A motorhomes are painted and clear coat protected in a state-of-the-art facility located right on the REV manufacturing campus. The results are easy to see....Better protection, better looks, and higher resale value after years of enjoyment.

19. Radiused and Cambered Entry Door

The industry standard square corner door allows for too much wind noise. So, we use a higher-end solution that fits your motorcoach's body better, latches more securely, and seals tighter.

20. Hide-A-Loft™ Overhead Bed System

A REV RV exclusive, our Hide-A-Loft™ Bed System offers a capacity of up to 500 lbs. The Hide-A-Loft system includes queen mattress that is incredibly comfortable and easy to operate.

21. Dealer Partnership

REV's dealer relationship goes beyond the expected. We listen to our dealers and are able to provide you with a motorhome you can be proud to own and that fits your needs. This partnership allows the dealer to be a bridge between the customer and REV Group.

Ceiling Interlock

You won't find stick and frame construction here. Our exclusive extruded aluminum allows the ceiling to "lock" with the wall structure, creating one solid aluminum assembly.

Five Layer Wall

Our Vacu-Bond™ walls feature an adhesive bonding process that applies up to 415,000-pounds of vacuum pressure to the welded-aluminum sidewall frame, bead-foam panel insulation, and Tuff-Coat fiberglass skin for more than 30 minutes — far exceeding industry standards.

Weld Joint

Every joint found in the frame of your Fleetwood motorhome has been welded by a certified welder to add strength to the frame, unlike the stick and nail construction found on other RVs.

The Power Platform Chassis™

The Power Platform puts strength, stability, and reliability front and center. Perfect for trips requiring large carrying capacities, and built to store everything you need with spacious pass-through storage, the Power Platform is the ideal chassis for optimum balance and control on Holiday Rambler gas motorhomes.

RV OWNERCARE

Limited one-year/15,000-mile coach warranty and three-year/45,000-mile structural warranty, whichever occurs first, and it is fully transferable for the first 12 months. RV OWNERCARE is one of the RV industry's most comprehensive programs and includes systems, appliances, components and construction, with no deductible and no service charge.

Horsepower: 320 HP @ 3,900 RPM

DISCLAIMER

- GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this fully loaded motorhome. The GVWR is equal to or greater than the sum of the (UVW) unloaded vehicle weight plus the (OCCC) occupant cargo-carrying capacity¹.
 - GAWR (Gross Axle Weight Rating) is the maximum permissible loaded weight a specific axle is designed to carry.
 - GCWR (Gross Combined Weight Rating) is the value specified by the motorhome manufacturer as the maximum allowable loaded weight of this motorhome with its towed vehicle. Towing and braking capacities may be different. Refer to Holiday Rambler and chassis manufacturer's manuals for complete information.
 - Length measured from front bumper to rear bumper (excludes accessories).
 - Excludes safety equipment and awnings.
 - Motorhomes feature a body width over 96" which will restrict your access to certain roads. Before purchasing, you should research any state and/or province road laws which may affect your usage.
 - Tank manufacturer's listed water capacity (WC). Actual propane capacity is 80% of water listing as required by the safety code.
- * The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing. Hitch receiver ratings expressed are maximum for the hitch receiver installed and may require the purchase of additional equipment that is dependent on the weight of the towed load. Consult with hitch receiver manufacturer for further information.

* UVW and OCCC are found on the label containing the federal certification tag in each RV.

** The Minimum Towable Load of this vehicle is the available weight capacity, up to GCWR, when the coach is fully loaded to maximum GVWR. However, if the coach is loaded to something less than maximum GVWR, that extra available weight capacity can be added to your Towable Load. For example, if your coach is loaded to 1000lbs less than maximum GVWR, your Towable Load increases accordingly. Do not exceed the hitch rating weight, GVWR or GCWR.

** Seatbelts and locations are shown in the brochure for display purposes only. Actual numbers and locations will vary by model.

*** All 2019 REV Recreation Group motorhomes include a limited one-year/15,000-mile coach warranty and three-year/45,000-mile structural warranty, whichever occurs first, and is fully transferable for the first 12 months.
