THE ONE AND ONLY INFLATABLE CAMPER

The AIR OPUS® is a revolutionary folding camper with endless possibilities for adventure! Our patented AIR pole technology allows you to inflate the tent in just 90 seconds, making set-up so quick and easy you'll want to go camping every weekend! The OPUS® can comfortably sleep a range of group sizes, and our optional AIR annexes allow you to actually double the overall living space.

Our trailers are lightweight and extremely easy to tow, even with a mid-size SUV. Their low profile allows for all around visibility, so you can hitch up easily and drive away with total confidence. Although they're smaller and easy to maneuver, they are also strong, rugged and very versatile. With two reinforced lids and a universal racking system OPUS® is the perfect load-carrying platform. Carry boats, carry bikes, carry kites, carry kayaks and more!

At OPUS® we don't think you should have to choose between practicality and comfort, so we match all of our functionalities with pure luxury. The true definition of 'glamping', the OPUS® allows you to bring the comforts of home with you without compromising that camping feeling. Soft double beds for the perfect nights' sleep; Plush leatherette seating for a comfortable place to relax; a stainless steel sink with running water and a kitchen with a 4-burner gas stove top and refrigerator... the list goes on and on! Plus our extensive range of options mean that you can design your own OPUS® to suit your camping style perfectly.

OPUS® provides you with freedom. The freedom to roam, the freedom to discover, the freedom to travel... wherever you want, whenever you want. Create unforgettable memories with family and friends. Explore new places or old favorites, roam the great outdoors experiencing the best OPUS® has to offer. Use it as a base camp for your favorite outdoor pursuits or a place to unwind and relax in. Our unique folding camper is adaptable, yet always providing the comfort and luxury that you deserve.

OPUS® OP 2 Starting at **\$22,499** MSRP

Our newest model, the OP2, includes all of the features of our original Off-Road, along with a some extras that make it perfect for smaller groups! Standard with one king-sized bed and a hot water shower built into the trailer, the 2-Sleeper floor plan was re-designed for a more comfortable glamping experience. By removing one of the bed ends, we've allowed for a ton of additional storage space.

(See more about this model on page 6)

OPUS® OP 4 Starting at **\$24,499** MSRP

Our flagship Off-Road model is back and better than ever before! With two double beds, and a convertible dinette lounge, this model is suited for families and larger camping groups. Some of the new features you'll see for 2020 are upgrades to the slide-out kitchen including an ever-so-handy foldable dish rack and cutting board. You'll also note that our patented AIR tents are now standard for all of our Off-Road models!

(See more about this model on page 8)

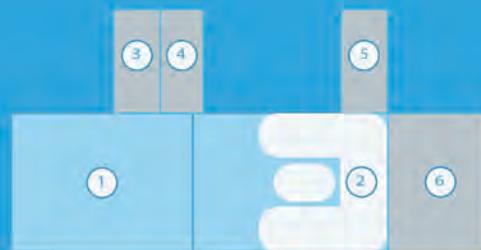

Starting at
\$22,499 MSRP

Following the success of our OPUS Off-Road 4-Sleeper, we decided to recreate the trailer with a floor plan that was more suitable for smaller groups. Given that the king bed extension was one of our most popular options on the 4-Sleeper, we've made a king sized bed standard on this new model. Along with the larger bed, this unit also has a hot water shower built into the tank, along with a shower extension tent which replaces the space for the opposite bed-lid. This extension room is removeable, so if you aren't planning on using your shower, you can leave it detached and enjoy a massive full-wall window!

When designing the OP2, we also took into consideration the need for storage space. By removing one of the beds, we've allowed for a ton of room for exterior storage space! The OP2 has three slide-out compartments, essentially giving you 3x the outdoor storage in comparison to our 4-Sleeper floor plan. We redesigned the kitchen and placed the fridge and burner/sink combo on opposite sides, allowing for a very open kitchen space. Similar to our 4-Sleeper, the OP2 also has an AIR annex option to cover your kitchen in the case of poor weather. If the exterior storage compartments are not enough for all your gear, this unit also has the option of a fold-able cargo rack to store 500lbs of camping toys!

OP2 FLOOR PLAN

1. King-Sized Bed
2. Convertible Dining Lounge
3. Fridge Slide-Out
4. Exterior Slide-Out Storage
5. Stainless Steel Slide-Out Kitchen
6. Shower Extension Room

COMFORTABLY**

**Starting at
\$24,499 MSRP**

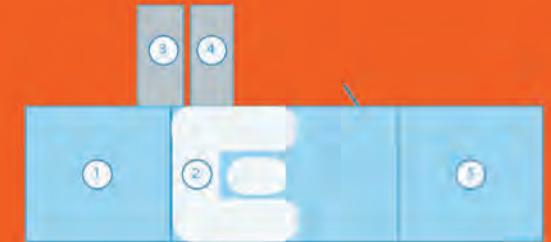

The OPUS® 4-Sleeper is our classic Off-Road model, designed with enough room for even the largest families. Although it's named the OP4 due to the fact that it's standard with two double beds, you can actually sleep 6 by converting the leatherette dining lounge. If you'd like a bit more space when sleeping, one of the double beds can be converted to a king with our king-bed extension option.

In addition to the comfortable beds, the OPUS 4-Sleeper is stocked with the best exterior kitchen on the market. With a stainless steel sink and 4-burner stove, you will feel like you are cooking at home with the addition of the beautiful scenery of the outdoors. Along with the kitchen pull-out, all of our 4-Sleepers are stocked with a Dometic CFX50 electric refrigerator to keep all of your food and drinks chilled on the go. If you'd like to get out of the sun or cook during rainfall, we have two awning options to keep your kitchen covered. First, our sun awning which solely covers the kitchen, and second being our full annex which essentially doubles the living space of your camper and adds sleeping space for an additional 4 people!

Not only does the OP 4 have room for all of your loved ones, but it also has a ton of storage space for your gear. Underneath the dining lounge, you will find interior compartments to store your clothing, toiletries, and board games! On the exterior, you will find a handy exterior slide-out that is perfect for cooking gear, or anything else you might need to grab on-the go, without having to open up the entire unit. By upgrading to our fold-over cargo rack option, you can also store a whopping 500lbs of gear on top of the trailer!

OP 4 FLOOR PLAN

1. Double Bed
2. Convertible Dining Lounge
3. Fridge Slide-Out
4. Stainless Steel Slide-Out Kitchen
5. Double Bed

LUXURY INTERIOR

When designing the OPUS, we kept the idea of "tough luxury" in mind in order to provide you a glamping experience off-the-grid. We've used the highest quality materials to create a breathtaking interior lounge. Once you take a step inside, you'll be blown away by the headroom due to our 8-foot ceiling space. Our patented air-tent technology allows our trailers to have much more headroom than any other pop-up camper on the market.

To add to the open design, we've placed sun-roofs and windows on every wall of canvas! Each window is made with 3 layers - first you have a mesh screen to keep out even the tiniest bugs. On a hot day, the screens will allow for a ton of ventilation to the point where you feel like you're still outside. The next layer is a UV-treated plastic, which is perfect for getting sunlight, even during rough weather. Lastly you have a full layer of canvas, which is perfect for blacking-out the interior before you head to bed. If you add our full annex option, you can even fold up the entire front wall of canvas to create one massive living space!

Each OPUS also comes equipped with luxury interior LED lighting and a stereo system, giving you the ability to entertain inside at all times. Not only did we want the interior of the OPUS to be luxurious, but we also wanted it to be highly functional. We've made perfect use of the space, by adding under-the-seat storage all around the dinette lounge and along the main entryway.

OFF ROAD CAPABILITY

The OPUS® Off-Road chassis has been designed to prepare it for all terrains. We've beefed up the suspension, and installed heavy duty coil springs, along with dual shock absorbers to ensure it can take a beating. To prepare for uneven terrains, we've removed the axle and angled the rear of the trailer to provide an impressive 12.4" ground clearance, making the OPUS® Off-Road your perfect over-landing companion. The OPUS® Off-Road comes with off-road all-terrain tires as standard, including the spare wheel carrier and the super effective articulating hitch with 360° mobility is just the icing on the cake!

Even with these upgrades, the weight of the OPUS® Off-Road remains incredibly manageable at under 3000lbs. Add roof bars to carry your toys and gear or alternatively choose our new side-pivoting cargo rack, which can hold an impressive 500lbs and simply folds over the top of your OPUS® when in use, with the help of gas struts.

To compliment it's extreme off-grid capabilities, the OPUS® Off-Road has a substantial battery life; the double 100ah deep cycle marine batteries powering your camper for up to 4 days. Add solar hook-ups and an optional 140 watt solar system for even more power on-the-go. Both floor plans also come standard with two 20 gallon water tanks, so you have enough fresh water for even the longest overlanding trips!

CAMPING IN ANY SEASON

The OPUS Off-Road was obviously built to handle any kind of terrain, but at the same time, it can also handle any kind of weather! The tent is completely waterproof, and can stand winds up to 55MPH without any compromise to its stable structure. Although the canvas is still a tent, it's made from very high quality poly-cotton so it is well insulated. With our tropical rain fly, you'll stay protected from the elements while still being able to open your sunroofs for ventilation. We have two upgradeable options for those who plan to camp in extreme weather:

First, we have our Dometic Atwood 16,000 BTU propane furnace. This is one of our most popular options for our OPUS owners who love to camp in the snow. We've had many customers vouch that the propane furnace kept them warm during a night of constant snow! This option has an MSRP of \$2000, and will allow you to stay warm off-the-grid without the need for electricity.

Next, we have our 10,000 BTU Dometic CoolCat Air Conditioner & Heat Pump combo. This unit is meant for those who plan to camp in the heat, though it is important to keep in mind that you will need a source of electricity to run this unit. A small generator or an on-shore power connection will keep this AC system running smoothly, ensuring the lounge stays cool. It's also good to note that the AC unit will be installed in the exterior storage slide-out (adjacent to the electric fridge). The CoolCat combo has an MSRP of \$2500. The AC/heat-pump combo is only available on our 4-Sleeper, while the propane furnace is available on both Off-Road models (OP2 and OP4).

See all of our available options on pages 17-20

OPTIONS TO KEEP YOU COVERED

The OPUS® Full Annex provides a huge extra living area for you to enjoy. It is custom made and is designed to compliment the shape and style of the OPUS®. The Full Annex means that you will always have the option of cooking undercover should the weather not be playing ball, and also doubles up as a sun awning for shade as the sides can be fully opened up.

The Full Annex uses the AIR OPUS® tent inflation technology to dramatically reduce setup time when traveling as a large party. Incorporating fixed bed ends featuring both roof and side windows and a larger internal floor area than our poled sun awning, our new air version will marvel spectators at any campsite!*

We also provide an OPUS Sun Awning (only available on the OP4), which is very easy to set-up as it zips onto your main tent and stakes into the floor. This is a much more simplistic option to give you some shade and cover your kitchen. Both the Sun Awning and Full Annex are fully removeable so you can use them as you please!

We understand that both freedom and flexibility are important which is why we've designed the OPUS Full Annex with flexible configurations ensuring the camper meets your group's needs. See our configurations below:

- AIR OPUS® Inflatable Annex: \$1999
- OPUS Sun Awning (Poled): \$249

FULL ANNEX SLEEPING CONFIGURATIONS

*Hot water shower comes standard on the OPUS 2-Sleeper, along with a shower extension room.

Our **AIR OPUS®** campers are designed and manufactured specifically to ensure maximum strength, longevity and ease of use whilst keeping overall weight to a minimum. The details below demonstrate the technical construction methods and highlight all aspects of our unique award winning design.

ALUMINIUM DIBOND WALLS

The external and internal walls of the AIR OPUS are constructed from Aluminium Dibond. This consists of two aluminium panels, separated by a Polyethylene core; providing a strong and lightweight outer shell.

POLYSTYRENE INSULATION

A 20mm thick sheet of Polystyrene sits between the internal and external Aluminium Dibond walls to provide insulation.

WATER PROOFED 10-PLY FLOOR

Built using 10-ply sheeting, with a water proofed layer to the bottom and a dark wood veneer to the top. This is then topped and sealed with industrial strength vinyl flooring.

POWDER-COATED ALUMINIUM FRAME

The frame is constructed using specially cast and welded aluminium. This helps keep our camper light and easy to tow and move, while ensuring maximum strength. The aluminium is then finished with a high quality powder coat to ensure longevity.

HIGH STRENGTH BONDING

Panels, frames and flooring are secured using a combination of screws, aluminium rivets and high strength bonding agent before being sealed with silicone.

WATER TIGHT FINNED SEALS

When the lids are closed and clamped down they are sealed tight with finned rubber seals for ultimate protection from water ingress.

PRESSURISED GAS SPRINGS

Highly pressurised gas springs are fitted to the lids to ensure easy set up, with just one person required to unfold the lids.
