

INTRODUCING THE OPUS CARAVAN

OP 15

HYBRID OFF-ROAD CARAVAN

The OPUS OP 15' is a hybrid caravan built with tough luxury in mind. It supplies a spacious, high quality bamboo interior and gives plenty of room for the whole family, both in storage and living space. It has aluminum struts throughout the bodywork to handle the roughest terrain, and di-bond aluminum panels to ensure longevity in its construction. The OP 15' was built for adventurers and overlanders alike, with a goal to get out there and explore what nature has to offer.

READY TO GET OFF THE GRID

The OP 15' is purposely built to handle all of the elements of the outdoors. Three 100ah AGM batteries are linked to a 300watt solar sytem to keep you powered on the go. An articulating hitch sits at the end of a galvanized steel chassis to tackle the roughest roads with ease. Underneath, there are twin shock absorbers and trailing arm independent suspension for each wheel. Diamond plating for the fresh and grey water tanks ensure functionality isn't at risk from rigorous terrain. It is ready for any kind of adventure, no compromise has been made in the rugged design of the OP 15' undercarriage.

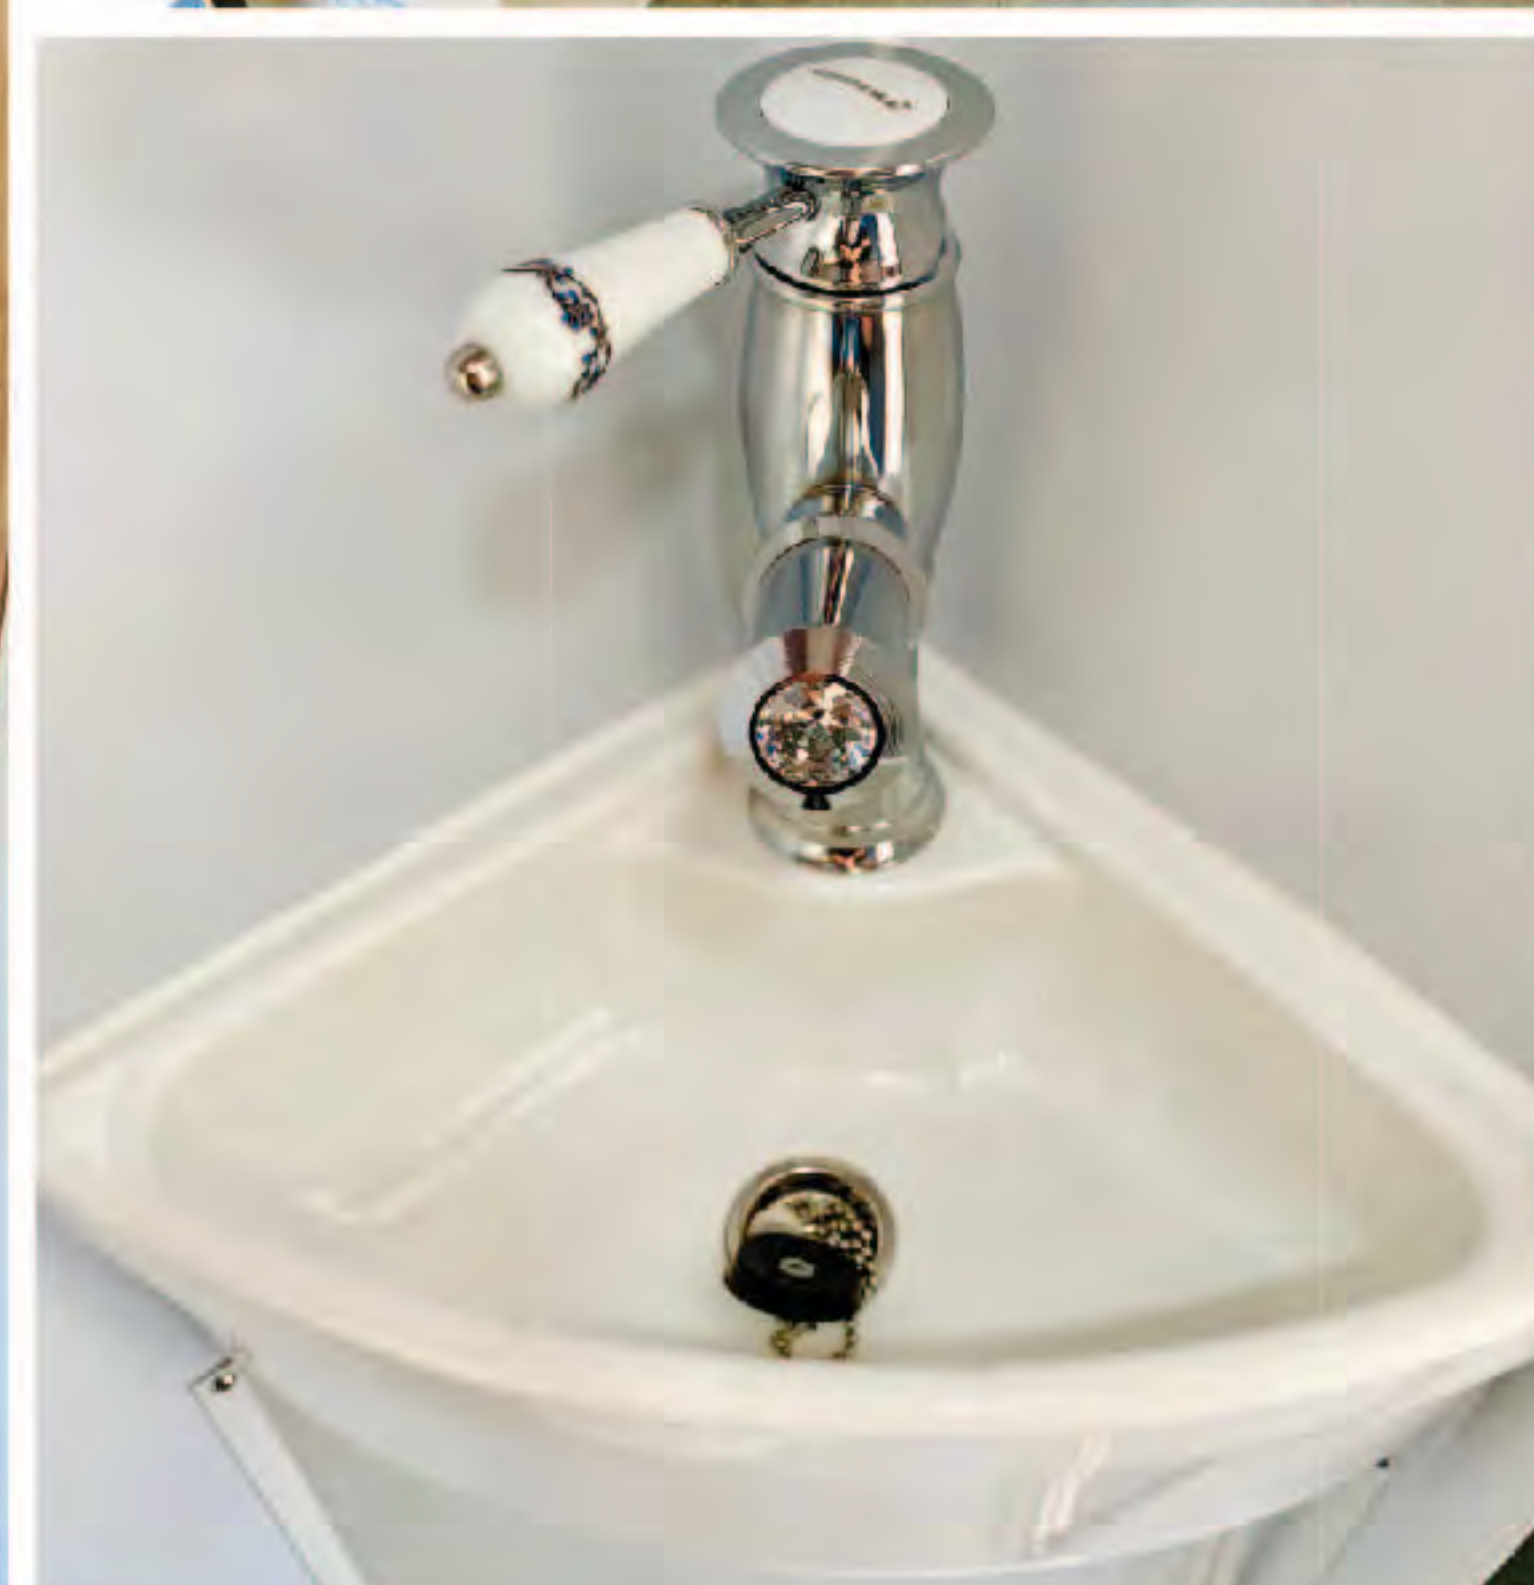

FULLY FUNCTIONAL CAMPING

A full kitchen experience comes in the form of an external fridge slide, slide-out stainless steel kitchen, chopping board, prep deck, and pantry access that are all in arms reach. To handle any weather, the OP 15' supplies on demand hot water, an interior heater, and built-in AC all as standard. The interior is loaded with a king bed, twin bunks, full-sized bamboo dresser, and a shower/toilet combo. We believe in the quality of our materials, so all of these elements are covered under the OPUS 2-year warranty.

OVERLANDING | TOUGH LUXURY | ADVENTURING
