

Egendary performance. Unsurpassed value. Boots

Stingray Boats began over 40 years ago with two molds, a few skilled craftsmen, and a passion to build great performing boats. That passion has endured and continues today. Boatbuilding is not just a business here at Stingray; it's a part of who we are. Building lifelong memories one boat at a time!

Stingray is a privately owned, family-run company that focuses on building quality, not quantity. We also provide our customers with the assurance that they are getting the most boat for the best price. This has been the driving force of Stingray for over four decades and has provided us with the honor of having two-time, three-time, and even four-time Stingray boat owners. It is this loyal following of families who love boating that will continue to drive our passion to keep building great boats for many years to come.

At Stingray, we know that our customers lead busy lives and want to make the most of their free time and money on the water. With that in mind, we take advantage of our performance history and the current market trends and combine that with our passion for building great boats. Stingray's motto is performance, quality, and value at a price more people can afford.

ENVIRONMENTALLY RESPONSIBLE

Being a leader in technology is more than just a philosophy — it's a commitment designed to help ensure the preservation of our natural resources for generations to come. At Stingray, fuel efficiency, waste reduction, recycling, and reduced stacked emissions are not just buzzwords — they are measured goals of each employee. Our commitment goes beyond that which is mandated or regulated — it is an internal philosophy to do our part to protect the environment for future generations. Consider a few of the things that we are doing to protect our planet:

USE OF FOUR-CYCLE ENGINES: Stingray uses only three-star rated, four-cycle engines, which are the cleanest and most fuel-efficient available for marine use. Better fuel efficiency translates into less fuel consumption. Three-star engines can be 4x to 10x cleaner than two-cycle outboards, which means less pollution to our environment.

OZONE-FRIENDLY FLOTATION FOAM: Stingray uses non-ozone deleting flotation foam by BASF. It is free of chlorofluorocarbons — gases that are depleting the Earth's ozone layer. Ask about the use of zero-ozone deleting (zone 3) foam when considering boating brands.

LOW VOC GELCOATS AND RESINS: Stingray was the first boat manufacturer to convert to the use of low styrene laminating resins and gelcoats. The combination of these low VOC materials, coupled with the latest in low-pressure, high-temperature spray equipment, has reduced Stingray's VOC stacked emissions by over 55%.

WASTE REDUCTION / RECYCLING: Stingray has a recycling program for most waste materials including, but not limited to, cardboard, composites, aluminum, pallets, and metal drums. In cardboard alone, Stingray recycles over 163,000 pounds per year.

COMMITTED: We want Stingray owners not only to have fun on the water but also to know that they are helping protect the environment at the same time.

FINANCIALLY SOLID

With Dun and Bradstreet's highest credit rating, Stingray is one of the most financially solid manufacturers in the industry. Stingray dealers and customers can depend on strong support for years to come. We are proud of our debt-free status — a claim that few builders can make!

VALUE & QUALITY-ORIENTED

As one of the founding members of the American Boatbuilders Association (ABAboats.com), Stingray is in excellent company with Bryant, Chaparral, Formula, Grady-White, MasterCraft, Monterey, Nautique, Regal, Sportsman, Tiara Yachts, and Tigé. This is another assurance that you are receiving the highest quality materials available at the best possible price. ABA members pool their expertise and resources to purchase only the best products and services available.

Z-PLANE HULL

The Stingray Z-plane hull is unparalleled in the industry. It is up to 30% more efficient than other boat hulls. Developed on a CAD (Computeraided Design) system, the hull design is unlike competitors' add-on lifting strakes. Stingray Z-planes act as horizontal planing faces when submerged; when very near the water's surface, the outside edge acts as a spray release, passing through the water with no bubbles or vortices. The smooth flow of water allows the propeller better bite during straight-line speed and hard cornering maneuvers. Extending beneath the swim platform, the design allows for quicker planing and three-point contact with the water at faster speeds. This combination results in a quicker hole shot, industry-leading top-end, and smooth handling at all speeds.

TECHNOLOGY DRIVEN

For the past four decades, Stingray has pioneered many of the advances of technology in the boat building industry. Equipment and tools that were not available just a few years ago are now the mainstays that enable Stingray to achieve unparalleled precision and efficiency (i.e., computer-aided designs, mutli-axis 3D milling machines, water jet cutting machines, and CNC routers).

COMPUTER-AIDED DESIGN AND MANUFACTURING: Every Stingray begins as a three-dimensional computer model. We "build" the boat on-screen and carefully scrutinize each component for size and fit, making all of the necessary adjustments before we ever commit the design to fiberglass. We even use a virtual human to check for legroom and headroom — and to be sure that all of the controls are located comfortably within reach. The information from this 3D model is sent to the next step in the process: 3D milling.

MULTI-AXIS 3D MILLING MACHINE: With information available from a 3D computer model, milling machines can produce a full-size model in a matter of hours — a task that would take weeks otherwise. With unequaled precision, the running surface of the hull is cut to the exact specifications. Our master craftsmen then provide the mirror finish that is a hallmark of Stingray quality.

ROBOTIC LAMINATION FACILITY: In our lamination building, a custom-designed overhead rail system was developed just for Stingray. Parts under construction are moved from one bay to the next for layup and curing. This system also keeps track of our in-process fiberglass parts while optimizing mold usage and improving productivity. Process automation also increases worker safety, helps maximize efficiency, and improves quality.

WATER JET CUTTING MACHINES: Many parts on a Stingray are cut using one of our high-pressure water jet machines. A stream of water no thicker than a human hair slices quickly and neatly through a variety of materials much easier than could be done by hand. Materials such as sea grass, foam, vinyl, canvas, rubber, and fiberglass are quickly transformed into precision quality parts.

CNC ROUTERS: Computerized numeric-controlled routers are used to cut various sheet goods into high quality parts. The computer allows us to "nest" a group of parts efficiently to minimize waste. Because the process is computer controlled, each part is dimensionally identical from one run to the next and can be finished much faster and less expensive than those produced by hand.

CE CERTIFICATION: Stingray competes on a global scale and has dealerships located throughout the world from the Middle East throughout Europe and Asia. Stingray boats destined for these countries must meet stringent standards prescribed by the Consultants Europe (CE) and bear the CE mark.

NMMA/USCG CERTIFICATION: All Stingray boats meet or exceed National Marine Manufacturers Association (NMMA) and U.S. Coast Guard (USCG) certification requirements for safety, such as horsepower, load capacity, steering, fuel systems, compartment ventilation, navigation lighting, and backfire flame control.

CSI AWARD: Annually, the Marine Industry CSI Awards program honors participating manufacturers that actively measure customer satisfaction and pursue continuous improvement to better serve the consumer. This measurement is based on responses provided by customers purchasing a new boat and/or engine (more than 155,000 last year alone). Over the years, Stingray has acquired numerous CSI awards for achieving and maintaining an independently measured standard of excellence of 90 percent or higher in initial customer satisfaction over an annual award period.

WARRANTY

Every Stingray boat is backed by a comprehensive warranty for peace of mind.

LIMITED LIFETIME TRANSFERABLE STRUCTURAL HULL WARRANTY: Stingray Boat Co. (hereafter "STINGRAY") warrants the HULL against structural defects in material and workmanship for a period of ten (10) years from the date of purchase or eleven (11) years from the date of manufacture, whichever period elapses first. The warranty provided in this section is to the original retail owner only and applies only if the boat is purchased from an authorized STINGRAY Dealer. During the warranty period described above, STINGRAY will repair or replace, at its option, the fiberglass HULL if it is unfit or unsafe for general use as a pleasure craft under normal conditions and, in Stingray's discretion, is determined to be structurally defective in material or workmanship. For purposes of this warranty, the HULL is defined as the part of the boat in contact with the water when at rest. The warranty provided in this section is subject to all limitations and conditions contained herein. The remaining term of this HULL Warranty, up to five (5) years, may be transferred to the second owner if, within 60 days of purchase, the new owner registers the transfer with an authorized STINGRAY Dealer and pays a seventy-five US dollar (\$75 USD) transfer fee. Visit stingrayboats.com/transfer for further details on transferability.

3-YEAR LIMITED OSMOTIC HULL BLISTER WARRANTY: STINGRAY warrants against hull blistering caused by osmosis that is discovered and reported to STINGRAY during the first 3 years of ownership (subject to the prorated schedule below). The warranty provided in this section applies to the original retail owner only and is VOID if the original factory gelcoat surface has been altered by excessive sanding, scraping, sandblasting, or accident repair. A marine barrier coating with proper surface preparation is required if the boat is bottom painted or if the boat is left in fresh or saltwater for more than 60 days in any 90 day period. In the event of osmotic blistering, STINGRAY will, at its option, repair or cause to be repaired any hull damage and apply a layer of marine barrier coating to the affected surface area(s). Osmotic hull blisters are defined as those blisters, larger than one-eighth inch in diameter and with a depth greater than one-sixteenth inch, which occur on the hull below the waterline. Repairs will be performed (at STINGRAY'S discretion) by the selling dealer, a designated service center, or the STINGRAY factory. The following prorated schedule of parts and labor will be covered by STINGRAY: Blistering discovered and reported to STINGRAY less than one (1) year from date of purchase - 100%; between one (1) and two (2) years from date of purchase - 66%; between two (2) and three (3) years from date of purchase - 33%. All osmotic hull repairs must be pre-approved by STINGRAY prior to any work being performed. Transportation cost is the boat owner's responsibility. Reimbursement shall be limited to one repair, not to exceed eighty US dollars (\$80 USD) per foot of hull length resting below the waterline prior to prorating.

1-YEAR LIMITED GENERAL WARRANTY: STINGRAY boats are warranted to the original owner to be free of defects in materials or workmanship for a period of one (I) year from the date of purchase (not to exceed two (2) years from date of manufacture) subject to all limitations and conditions contained herein.

WARRANTY INFORMATION: All Stingray warranties are limited warranties within the meaning of Title 1 of the Federal Trade Commission Improvement Act. A full statement of coverage, terms, and conditions applying to the Stingray warranty has been furnished to all dealers. In addition, information is supplied with each new boat. Please read carefully the terms and conditions provided in Stingray's Express Limited Warranty accompanying the sale of your boat. The actual length of warranty coverage for your boat may vary depending on the date of original manufacture and sale date of your boat.

- The cabin features two port windows, interior lighting, a mirror, built-in speakers, and mesh storage pockets.
- Stainless bow rails flank each side of the bow; pop the deck hatch to easily access the bow anchor locker storage, or to provide a little extra air

- co-captain; flip-up bolsters quickly adjust to an up or down position.
- to stretch out and sleep overnight on the water; lift the cushions to reveal the Porta Potti.
- to the cabin.

STARTAL STARTAL

 A step-down cabin entry leads to a spacious V-berth with built-in speakers, four-point adjustable lighting, sink, and a storage cabinet; raise the cushions to reveal a Porta Potti, portable butane stove, and additional storage.

> A convenient walk-thru companionway is revealed when the center cushions are removed; if you need extra seating, just quickly reattach the center cushion.

- Sport bucket seats with flip-up bolsters provide comfort for both the captain and co-captain.
- Built-in fiberglass steps lead to a non-skid foredeck for easy access when docking or dropping anchor; solid cabin doors provide privacy when sleeping.
- The cuddy is packed with amenities, including a stand-up bimini top, and offers a deep cockpit design.

225 CR CUDDY CABIN

More information at StingrayBoats.com/225CR

- To maximize cabin space, the cabin is level with the cockpit floor; cushions lift to reveal accessories, storage and a porcelain head; a storage closet and multiple cubby holes provide an abundance of storage space.
- Wrap-around seating provides room for your passengers to stretch out and enjoy the ride; sport bucket seats with flip-up bolsters provide comfort for the captain and co-captain.
- An ice chest and entertainment center are amidships for easy access when the cocktail table is set up for drinks and snacks; an optional 12-volt Isotherm refrigerator upgrades the 25-quart removable cooler below the freshwater sink.
- design that reserves room for an aftermarket plotter; switches and controls are at the captain's fingertips and finished with a sporty steering wheel.

The helm features a split-console

250 CR CUDDY CABIN

More information at StingrayBoats.com/250CR

- This magnificent dual console is completely versatile and can be utilized for any activities you and your family want to enjoy. The optional hardtop provides immense shade and protection from the elements and is available with six different underside color options.
- As you walk through the safety glass windshield from the helm, extremely comfortable seating awaits you in the bow. Upgrade with the optional bow filler cushion for complete lounging.
- Available seating in the cockpit is ample, as is the room to fight the fish should you choose to take the crew out for the prize catch. And you can keep those prize catches in the insulated fish/storage box located aft.
- The enclosed, lighted head offers a Porta-Potti, or can be upgraded with dockside pump out or even a porcelain head with holding tank and pump out.

'Only EPA approved engines are available in the U.S. See your dealer for details.

Specifications are subject to change at any time without notice or obligation. To avoid disappointment at the time of purchase, please check with your Stingray dealer for current information and specifications.

Performance data comes from factory testing, independent engine manufacturer testing, or independent magazine testing. All boat speeds and propellers shown are to be used as guidelines only for general applications as boats and operating conditions vary. The best propeller for specific boating needs can be determined only by performance testing by your dealer. Results on individual boats may vary depending on many factors, including driver, weather, altitude, load, condition of propeller, lower unit, and boat bottom. Matching of our boat and use conditions to the propeller by your dealer will make your boating experience more enjoyable and keep your engine running longer and stronger. Propellers used during testing are shown to be used as a guideline only and are not intended to be used as an absolute recommendation.

CAUTION: Engine should be propped based on load to run at the upper end of the recommended RPM range at WOT to avoid damage caused by lugging. Throttle position must be reduced to avoid excessive RPM when using lower pitch prop to improve low-end performance for water sports.

Speeds shown are the maximum expected at sea level with light load, 70° F temperature, and the best performing SS propeller.

WARRANTY INFORMATION: All Stingray warranties are limited warranties within the meaning of Title 1 of the Federal Trade Commission Improvement Act. A full statement of coverage, terms, and conditions applying to the Stingray warranty has been furnished to all Stingray dealers. In addition, information is supplied with each new boat. Please read carefully the terms and conditions provided in Stingray's Express Limited Warranty accompanying the sale of your boat. The actual length of warranty coverage for your boat may vary depending on the date of original manufacture and sale date of your boat.

ABOUT THIS CATALOG: Some boats are shown with optional third-party accessories. Styling, design, equipment, prices, colors, and construction are subject to change without notice or obligation.

To avoid disappointment, please check with your Stingray dealer or visit StingrayBoats.com for current information at the time of purchase.
