PONTOONS

SUPERIOR DESIGN, QUALITY AND CRAFTSMANSHIP

At Bentley, our dedication to quality and craftsmanship runs deep. That is why we make our own components such as furniture, canvas work, tubes and railings. This ensures quality control while saving time and money so we can offer the best value on the water. Our in-house design and product development assures quality construction and functionality of our boats. We are focused on offering a great boat at an affordable price, to provide enjoyable time on the water for you and your family. The manufacturing plant is located in Lexington, South Carolina and employs a group of highly skilled, hard-working individuals. These employees pride themselves in creating a great product each and every day.

In-house aluminum fabrication includes CNC routers, brake presses, shears and welders to produce all necessary parts internally.

25" diameter pontoon logs constructed from .080 aluminum sheet are standard. They include full solid keel and the baffles have drain holes.

.190 Aluminum transom on all Bentley, Fish, and Elite Models standard.

.190 aluminum hat channel crossmembers are used at the rear transom/motor mount area to provide ultimate strength.

In-house powdercoating provides a high quality finish on all rails and ladders.

Playpen/Mooring covers are made in-house and installed at the factory to ensure proper fit and quality.

ELITE ADMIRAL

Sleek and stylish, the Elite Admiral Series offers comfortable seating and plenty of amenities. This specific model offers a center walk through floorplan with dual captain's chairs and is finished with an extended rear deck. You're sure to enjoy superior performance, capability and comfort all while cruising on an Elite Admiral.
