ABOUT SCOUT

On a mission to regain the pioneering spirit.

Scout was born as an alternative solution to the rigid and inflexible nature of traditional recreational vehicles. Unlike any other, these lightweight truck campers were built with simplicity and flexibility in mind which has led to their highly versatile, innovative design. Scout's amenities can be taken out and enjoyed independently, and the options for customization are endless.

Special Features

Explore the Possibilities.

Portability

- Portable amenities that can be taken out and enjoyed outside the unit: portable water storage, portable power station, the optional dual zone fridge/freezer, and more optional add-ons
- The optional hanging storage bags offer additional storage and easily attach/detach to the ceiling hooks
- The optional removable camper jacks lower travel weight and grant more maneuverability

Off-Grid Capable

- Solar: 175W monocrystalline solar panel
- Energy: portable power station with USB ports, 110V outlets, and a built-in inverter
- Water: portable 4.9 gal water storage with charcoal filtration system that can filter up to 2460 gals of water on the go
- Add-ons: Dometic 2.6 gal portable toilet, Roto Pax 2 gal water storage, Rhino Rack batwing 270 degree awning, and more

Simplicity

- Low energy requirement
- Gravity-fed water system
- Self-contained & self-sufficient
- Minimalist design inspired by nature
- Standard Features: 175W solar panel, portable power station, portable water storage, ratchet tie down system, gear locker, and moon roof

Highly-Customizable

- Industry first add-ons: roof-top tent that is accessible from inside the camper (Olympic, Kenai), real flame 4.5K BTU propane fireplace, removable camper jacks and more
- A wide selection of optional features to personalize & customize the unit
- Create your perfect overland basecamp with aftermarket add-ons

FAQ

Where can I view a Scout?

To coordinate a viewing, please connect to a Brand Representative who will help you find the dealership nearest you. Since our 2020 launch, our viewing locations are rapidly expanding and we will soon be including dealerships and ambassadors all across the continent

Is the camper built for cold weather camping?

Yes! Scout campers are constructed for 4-season travel and offer plenty of comfort for cold weather camping. The optional real flame propane fireplace is ideal for winter camping and the exterior gear locker is a great place to store gear, skis and snowboards, making it the perfect winter basecamp for winter sport enthusiasts.

Where is the bathroom?

Scout campers offer a few bathroom options. The Olympic and Yoho have the option for the Dometic 2.6 gal portable toilet, while the Kenai model offers a designated bathroom space for the integrated cassette toilet and the portable shower option.

Can you use the camper while it's off the truck?

Yes, our campers are designed to be used off the truck. You can purchase a Scout with lightweight removable camper jacks to help with easy onload/offload. One of the great things about truck campers is that they give you the ability to set up camp, off-load your camper and then freedom to use your truck for other things like hunting, launch the boat, running to town, etc.

How does the truck camper secure to my truck?

The camper secures to your truck through a ratchet/hook system that connects to the floor anchors in your truck box. All Scout campers come standard with a ratchet tie down system.

Is there an option for air conditioning?

While we don't currently offer AC, each unit comes standard with integrated ventilation/exhaust in the galley, and the double pane windows on both sides of the camper can be opened to create a cross-breeze.

What makes Scout a great off-grid camper?

Scout campers give you everything you need to leave cities and campsites behind. It's for those who want to be totally self-reliant and independent when they travel. Scout's 4-season construction means that you can remain self-sufficient all year round with optional add-ons that can enhance your off-grid camping experience. Scout stands out as a lightweight truck camper because of its portability, energy efficiency, and options for customization.

How long does the pop-up tent take to set up?

The roof-top tent option, available for the Olympic and Kenai models, is very easy to set up and only takes only a minute to do so. All you have to do is open the latches and then pop it open. The tent can be accessed from inside the camper through a hatch we build over the dinette. It also comes with a ladder for exterior access.

Is there a warranty?

Yes, all Scout campers come with a structural warranty that begins as soon as you take delivery.

Made especially for

Adventurous Families

Scout is the perfect family camper. The optional pop-up tent is great for children, the portable amenities can be taken out to other events like sports tournaments or BBQs, and its hybrid composite construction means it's safe & reliable for 4-season travel.

Outdoor Enthusiasts

Scout's off-grid capability and self-sufficiency make it ideal for those who want to recreate in nature and enjoy outdoor sports like biking, fishing, climbing, hiking, and snow sports. Scout allows users to explore remotely to access nature-rich locations.

Weekend Warriors

Scout is made for those who live for the weekend and value getting away from the city swiftly. The simplicity of each unit allows users to plan spontaneously and collect what they need, like water, power and food, on the way.

Take the Inside Out

The World is
Your Kitchen.

- **UNLIMITED WATER:** The portable Lifesaver 4.9 gallon water storage comes with a charcoal filtration system so that you can refill water at the destination and reduce your travel weight while driving. Filter up to 2640 gal of water on the go!
- **COOK INSIDE OR OUT:** Enjoy the unrestricted lifestyle of cooking inside or out. The optional and portable Dometic 2 burner cookstove allows you to cook and spend more time outside. In the Olympic model, the upgrade to an exterior pull-out table top comes with an exterior gas hook up too. Bring out the portable Dometic fridge/freezer and the world will truly be your kitchen.
- **270° OF PROTECTION:** The optional Rhino Rack batwing awning provides 270 degrees of coverage for any kind of weather protection. It's compact, lightweight, and made from a heavy-duty, water and mold resistant material that has been tested and rated to UPF 50+.
- **SUSTAINABLE ENERGY:** Welcome to power that is clean, efficient, and quiet. The portable Goal Zero Yeti power station offers dependable energy with 110V outlets and USB ports. Work, charge your camera, or hook up your speakers outside. Do all this while it's charging from the monocrystalline solar panel.

Clean, Natural & Self-Sufficient.

Inspired by Nature.

Scout is inspired by nature itself. Our campers require little energy to run and there is an overall reduced need for power due to innovative design like a gravity-fed and detachable water storage, powerless toilet options, solar integration a portable power station, and the optional real flame propane fireplace. All your needs can be supplied by nature, letting you travel self-sufficiently without limits.

4- Season Construction.

Scout Campers are among the only solid wall campers in the lightweight category. Built with aluminum exo-skeleton framing, these lightweight campers are highly durable and built for 4-season travel. Our no-wood composite structural panels will never rot leaving you with a camper that will last for generations.

Olympic 6.5

The Olympic is the first model of the Scout fleet. This highly-capable off-grid truck camper can sleep up to 6 individuals, offers plenty of customization options like the exterior pull-out table top or roof-top tent, and fits full-sized import and domestic trucks. Designed with flexibility in mind, our portable amenities and features can be taken out and enjoyed outside too.

Kenai 8.0

The Kenai is the biggest and fully-featured model of the Scout line. It offers more comforts on the road like extra storage, a bigger bed, a mud room, and a designated bathroom space. Sleeping 4-6, highly-customizable, and built for heavy half-ton to 1-ton short and long box trucks, this might be the most practical truck camper ever made.

BUILT BY ADVENTURER MANUFACTURING LTD

Trust 50 years of industry knowledge and experience. Scout is manufactured by Adventurer Manufacturing who builds award-winning Adventure Vehicles out of Yakima, Washington. The company's mission to do everything possible to ensure their customer's vacation dreams be realized.

An aerial photograph showing a dark-colored pickup truck with a Scout brand pop-up camper installed in the bed. The truck is parked on a gravel clearing next to a calm lake. The surrounding area is a dense forest of tall evergreen trees. In the background, more trees and distant mountains are visible under a clear sky. The Scout logo is visible on the side of the camper.
