OPUS[®]
OFF-ROAD

STAY OFF-GRID EVEN LONGER...

LITHIUM BATTERIES
DC - DC CHARGER
CRUISEMASTER D035 HITCH
SOLAR PANEL PORT
ZAMP SOLAR PANELS

OFF-ROAD & OFF-GRID READY

The OP4 features an upgraded, all-terrain chassis with Off-Road 15" tires and independent coil suspension, perfectly suited to follow you wherever you want to go. With 40 gallons of water on-board, and 3-4 days of built in battery life (with solar power options), you can get off the grid while still living luxuriously.

Our 2022 Model includes an upgraded front tool box to provide additional space for larger fridges, a rack-mounted hot water shower & shower tent and an upgraded annex using 300D Nylon tent material which is lighter-weight and dries faster making packing away easier than ever before.

AIR TENT TECHNOLOGY

The OP4 features our innovative, multi-award winning AIR OPUS tent, which allows you to effortlessly set up your tent at the touch of a button. Our patented AIR Inflation technology incorporates a built-in compressor which inflates the tent in just 90 seconds so that you can set up camper faster and start enjoying your trip sooner. The AIR tent frame is tough and built to withstand rough weather conditions while providing you with a bright, spacious, comfortable living space complete with skylights for star gazing.

OUTDOOR COOKING EXPERIENCE

The OP4 stainless steel kitchen slides out to a fully-functioning off-grid outdoor cooking experience so you never miss a moment of the action. Includes a 4-burner stove with wind guards, stainless steel chopping board, sink with running water, LED outdoor cooking light and a 12v electric fridge.
