WWW.FORESTRIVERINC.COM/WILDWOOD | WWW.FORESTRIVERACCESSORIES.COM

PRE-DELIVERY INSPECTION FACILITY

20,000 square feet of quality assurance. The bare essentials for a premium product.
This state-of-the-art facility gives immediate daily feedback to production for quality
assurance in every unit built.

Specification Definitions

GVWR (Gross Vehicle Weight Rating) - is the maximum
permissible weight of the unit when fully loaded. It includes all weights,
inclusive of all fluids, cargo, optional equipment and accessories. For
safety and product performance do NOT exceed the GVWR.

GAWR (Gross Axle Weight Rating) - is the maximum
permissible weight, including cargo, fluids, optional equipment and
accessories that can be safely supported by a combination of all axles.

UVW (Unloaded Vehicle Weight)* - is the typical weight
of the unit as manufactured at the factory. It includes all weight at
the unit's axle(s) and tongue or pin and LP Gas. The UVW does not
include cargo, fresh potable water, additional optional equipment
or dealer installed accessories.

*Estimated average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** - is the amount of
weight available for fresh potable water, cargo, additional optional
equipment and accessories. CCC is equal to GVWR minus UVW. Available
CCC should accommodate fresh potable water (8.3 lbs per gallon).
Before filling the fresh water tank, empty the black and gray tanks to
provide for more cargo capacity.

** Estimated average based on standard build optional equipment

Each Forest River RV is weighed at the manufacturing facility prior
to shipping. A label identifying the unloaded vehicle weight of
the actual unit and the cargo carrying capacity is applied to every
Forest River RV prior to leaving our facilities.

The load capacity of your unit is designated by weight, not by
volume, so you cannot necessarily use all available space when
loading your unit.

All information contained in this brochure is believed to be accurate at the time of publication. However, during the model year,
it may be necessary to make revisions and Forest River, Inc., reserves the right to make all such changes without notice, including
prices, colors, materials, equipment and specifications as well as the addition of new models and the discontinuance of models
shown in this brochure. Therefore, please consult with your Forest River dealer and confirm the existence of any materials, design
or specifications that are material to your purchase decision. Litho. U.S.A. FOR 1609 P/W: 2019.01.22

Specification Definitions

GVWR (Gross Vehicle Weight Rating) - is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

GAWR (Gross Axle Weight Rating) - is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles.

UVW (Unloaded Vehicle Weight)* - is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

*Estimated average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** - is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity. ** Estimated average based on standard build optional equipment

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities. The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.
