*Jayco tested RV's in zero degrees F and 100 degrees F weather over an extended period of time in a controlled environment, and all functions of the coach were fully operational. Testing was done in a completely controlled environment; therefore, temperatures during testing may not represent actual temperatures in nature and cannot account for elements such as wind or moisture. In actual use, unit may not perform as well. Supplier of cooling components does not guarantee anything better than 20 degrees difference from ambient temperature. In addition, outside components are subject to freezing and require steps to properly insulate. Jayco's limited warranty does not cover damage caused by freezing.
