## QUALITY PACKAGE

Scan this QR code to learn more about our quality package and each individual floorplan layout.

**GWRV (Gross Vehicle Weight Rating):** the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed GWRV.

**GAWR (Gross Axle Weight Rating):** the maximum permissible weight, including cargo, fluids, optional equipment, and accessories that can be safely supported by a combination of all axles.

**UVW (Unloaded Vehicle Weight):** is the typical weight of the unit as manufactured at the factory. It includes all weight at the units axle(s) and tongue or pin and LP gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

**CCC (Cargo Carrying Capacity):** is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GWRV minus UVW. Each Forest River RV is weighed at the manufacturing facility prior to shipping a label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities. The load capacity of your unit designated by weight, not volume, so you cannot necessarily use all available space when loading your unit.
