

QUALITY

Winnebago RVs are designed and built around you, with superior craftsmanship, advanced manufacturing technologies and steel-focused construction to enhance safety and reliability.

INNOVATION

From groundbreaking RVs to game-changing features to the spacious floorplans made possible by our SmartSpace™ design, our heritage is unrivaled for continuous industry firsts in vehicle technology and design.

SERVICE

Our carefully chosen dealers are supported by factory training and our advanced parts supply system, while owners benefit from excellent real-world customer support as well as 24/7 access to online technical information.

BELONGING

Winnebago owners are a connected community – some of the friendliest, most knowledgeable and welcoming RVers you'll find anywhere.

MICRO MINNIE FLX

Make Yourself at Home – Anywhere.

4 integrated technologies allow you to go off the grid for up to 5 days without a generator or external hook-ups.

FLX System Energy Components

To keep you powered up off-grid, two roof-mounted 200-watt Go Power!® solar panels charge the 320-amp.-hour Lithionics® lithium-ion battery via the 30-amp MPPT charge controller, while the Xantrex™ 3,000-watt XC Pro pure sine wave inverter provides clean 110-volt AC current when you need it.

FLX System Climate and Water Components

The ultra-efficient Truma® AquaGo® Comfort+® water heater, VarioHeat™ furnace and Aventa air conditioner are all managed by a single intuitive controller. The Truma® AquaGo® Comfort+® water heater extends your water supply by providing instant hot water to your faucets and shower.

Outdoor Living

In camp, the power tongue jack and power stabilization jacks make setup and leveling easy. Deploy the powered patio awning with LED lighting and play your favorite playlist through the JBL® premium exterior speakers. A convenient camp-side spray port makes it easy to wash the day's dust off before calling it a night.

Standard Features

The Micro Minnie FLX comes with a long list of standard features, including a 2" accessory receiver hitch, fully enclosed holding tanks equipped with 12-volt pad heaters and an interior switch, Goodyear® Wrangler® 15" off-road tires with aluminum wheel assemblies, Wi-Fi prep, USB charge ports, and a wireless cellphone charger.

Comfortable Retreat From the Day's Adventures.

Expansive Space

Five available slideout-equipped floorplans provide plenty of living and storage space, and sleep up to five.

Flexible Furnishings

Stick with the standard dinette, which converts to a comfortable sleeping space, or upgrade to the EZ Glide Sofa Sleeper with hutch and table. Some models may be equipped with a Murphy bed that converts to a sofa for daytime use.

Full Galley

Enjoy your favorite meals anywhere you camp. The full galley includes a 3-burner cooktop, microwave-convection oven, and a large refrigerator that runs directly off the battery for added efficiency.

Choice Entertainment

When it's time to relax, fire up the Smart TV or set the mood with the JBL® Aura Cube entertainment center with JBL® premium speakers.

Complete Bath

Off the grid doesn't have to mean roughing it. All Micro Minnie FLX floorplans include a dry bath with full shower and stand-alone toilet.

 Tire Pressure Monitoring System prep

Plumbing System

Truma® AquaGo® Comfort+® water heater
 31-gallon freshwater tank
 25-gallon black tank
 25-gallon gray tank

Warranty

See your dealer for complete warranty information.

FOOTNOTES

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of our vehicle may vary by several inches depending on chassis or equipment variations. Please contact your dealer for further information.
- Floorplans feature a wide-body design - over 96-inches. In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96-inches in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Sleeping capacity is the maximum based on a specific floorplan.

Because features, specification, equipment, and options may vary from those highlighted here, the buyer is responsible for confirming with the dealer the features, specifications, equipment, and options included in their specific vehicle. In addition, Winnebago's program of continuous product improvement may result in changes to vehicle specifications, equipment, model availability, and price without notice.
