TRAILERS

8148 Ronson Rd. #A, San Diego, CA 92111

Meet the MeerKat™ Trailer

We named our trailer after the Meerkat, a small energetic animal that's always ready to go. It stands tall and pokes its head up to look around. The MeerKat is the perfect trailer for people who own small cars, allowing them to enjoy the fuel economy that their everyday car offers, even when towing a trailer.

Easy to Use

MeerKat owners enjoy getting out into nature to relax. They are people who enjoy camping, but don't want to sleep on the ground. The MeerKat is for those who understand that bigger is not always better and would rather be camping and exploring than preparing an RV and a big tow vehicle for a trip, or dealing with gray water, black water, and fresh water tanks at the end of a trip.

Easy to Appreciate

The MeerKat may be small, but it's got it all! It weighs only 920 pounds, so it can be towed with almost any 4-cylinder vehicle. We feature stand up headroom; the ability to be stored in a garage; easy set up; porta potty; hanging closet; tons of storage; a dinette and a roller system bed that sleeps two comfortably.

Easy to Keep

The MeerKat is easily maneuvered by hand. Just unhook it from your car and push it into place. It will fit in a standard garage, so there is no need for expensive monthly storage bills.

Easy to Feel at Home

The interior offers a very comfortable living arrangement, with an attractive wrap around seating area and a small table that converts into a bed. Under seating storage and several cabinets provide for all your storage needs. The trailer is fully insulated, and the screened windows on the back and sides open for ventilation as do the vents in the top.

The MeerKat™... everything RV-ing was meant to be!
