Our story begins in the heart of Ohio Amish country. A minister by calling, and a plumber by trade, at the age of 44, Joe Mullet found himself building lawn furniture. While he was committed to both quality and innovation, he was longing for something more, something different.

In 2003, Joe was presented with the opportunity to build teardrop trailers – and a new journey began. Within one year, Pleasant Valley Teardrop Trailers was officially founded, and the boutique operation moved out of Joe’s garage and into a 3,000-square-foot shop with a small team of local craftsmen.

Joe was intentional about creating a culture that cared deeply – not only for his team, but also for the product and the customer. The company hand-built fifty campers during its first full year in business. It continued to grow, expanding its product offering, factory size, and workforce.

Success followed over the next few years; however, as the recession of 2008 took its toll on the industry, Pleasant Valley joined dozens of other RV manufacturers and was forced to close its doors. That same day, opportunity came knocking. Within a matter of months, Joe was able to get back on his feet, reassemble his team, and start anew – this time with the assistance of a national distributor.

In the years that followed, the company acquired the rights to build the iconic TAB Teardrop Camper, created the TAG Teardrop Trailer, and ventured into a new world with the Cirrus Truck Camper. As Pleasant Valley found itself outgrowing the need for a distributor, the company knew it was time to rebrand. In 2016, the name nuCamp was selected as the company sought to honor the community’s German heritage, celebrate its new beginnings, and tip its hat to the industry.

With the mission ‘to build the exceptional’ nuCamp chooses to place quality and customer care squarely at the center of everything they do. Perhaps that is why nuCamp continues to hold the title as the world’s largest manufacturer of teardrop trailers!
