SOARING EAGLE CAMPERS

Affordable, Lightweight, Truck Topper Campers for True Outdoorsmen!

SOARING EAGLE CAMPERS

The entry level truck camper market typically features campers mostly made with wood construction, covered by thin metal. SOARING EAGLE CAMPERS constructs our campers

ALL-ALUMINUM

using all-welded tubular aluminum construction with aluminum exteriors and composite interiors. Our models are minimalistic, yet refined with special attention given to outdoorsmen and those true camping enthusiasts who are more about the adventure and time spent

outdoors than what amenities are inside their camper.

Soaring Eagle Campers customers are hunters, fishermen, hikers, kayakers, mountain bikers, etc. who just want a more comfortable night's sleep in a camper that will not overload their medium and light duty trucks. With these customers in mind, Soaring Eagle Campers is just doing our best to provide a quality-built product, made with superior materials, that will provide years of carefree use.

The entire structure of a Soaring Eagle Camper is welded together to form a strong, UNI-BODY construction that

will stand the test of time and the rigors of the road! The unit is easy to keep warm or cool as each section is fully insulated, including the floor, walls and roof.

The entire STRUCTURE of a Soaring Eagle Camper is wood-free, providing the best value for your money!

ALL WELDED, TUBULAR ALUMINUM CONSTRUCTION - No Slotted Tubes!

NO WOOD - NO ROT!!

OUR STORY

OV-X TRUCK TOPPER

OV-X

Unmatched Quality Build - It's About What You Can't See That is Most Important!

Soaring Eagle Campers OV-X ultra-light, truck topper camper offers a pull-out king bed with mattress that has built-in storage underneath that is perfect for gun cases or bows. By leaving the bed of the truck open, the OV-X provides storage for just about anything you would ever want to take on your adventures. The top of the OV-X goes up and down with ease utilizing a proprietary lift bar mechanism, supported by gas struts on the exterior. The tent fabric is both waterproof and durable, providing years of carefree usage. Two large 12V vent fans in the roof feature LED rings around them to light up the interior of the camper. A lot of thought went into the design and manufacturing of the OV-X and it shows in our superior construction methodology and superior components.

The OV-X's unique, proprietary steel lift bars lock into place and are not in the way during travel or camping. They also allow for front and rear windows so you get a better view of your surroundings.

OV-X

**GO ANYWHERE
CAMP ANYWHERE
WITH NO
RESTRICTIONS
THAT'S FREEDOM**

Just getting away and enjoying nature is something that brings joy and relaxation to so many people in the world today. The OV-X truck topper series from Soaring Eagle Campers allows you to take all of your gear with you, while pulling your boat or trailer and maximize your outdoor camping experience.

Be sure to check into the structure of a truck topper before you purchase one. There are too many shortcuts taken by a lot of manufacturers, including slitting their aluminum tubes to make their front radius, and using super thin sheet metal for their roof coverings. Don't settle for less - demand the best and the OV-X is the best value on the market for the overland enthusiast!

Freedom has never been more fun! Choose the versatile OV-X from Soaring Eagle Campers to maximize your outdoor adventures. With a model for just about every truck bed size, the OV-X allows users to still fill the bed of their trucks with all their gear, while still being able to enjoy a safe, comfortable place to sleep at night in our massive king bed!

OV-X

Whether you enjoy hunting, fishing, kayaking, mountain biking, hiking, or any other outdoor activities, the OV-X is designed to take you places that other small, towable campers simply cannot go!

**TAKING YOU PLACES
NO ONE ELSE CAN
GO! TRAVELING THE
HIGHWAYS IS WAY
OVERRATED!!**

A MODEL FOR EVERY TRUCK BED SIZE

OV-X

Now with models to fit just about every truck bed size, the OV-X by Soaring Eagle Campers is fully insulated with thick, block foam insulation and covered inside with a composite board, and outside with durable metal sheeting. The roof is strong enough to walk on (in the down position) with strong tubular aluminum framing; is fully insulated; and is covered inside and out with one-piece, seamless fiberglass making it the strongest, most durable roof in the truck topper market.

The Strongest Roof on the Market!

You will appreciate Soaring Eagle Campers proprietary electrical center - crafted from durable composite material, this electrical center offers switches for the lights and vents, as well as chargers and a home for the solar controller!

Designed specifically for the small truck market, including the popular Jeep Gladiator and Toyota Tacoma models with 5' beds, the OV-X 5.0 is an ultra-light, extra rugged camper offering a pull-out bed with mattress that has built-in storage underneath.

Popular options include roof solar packages; exterior molle boards; rear flood lights; power roof vents, batwing awnings and more!

A SOARING EAGLE CAMPER WILL OUTLAST YOUR TRUCK!

Is a Soaring Eagle Camper more expensive than some other campers with more features? Yes, and it is because we have constructed a camper that will outlive your truck. Don't try to "save" money by buying something of lesser quality that you will be continually reaching into your pocketbook to fix or repair over the years. Don't settle for less, go with the best, OV-X!

OV-X

SOARING EAGLE CAMPERS ARE NOT CHEAP.

It's not cheap to build a truck camper using all tubular aluminum framing that is welded together.

It's not cheap to build our roof using all tubular aluminum and cover it with a one-piece, seamless fiberglass piece.

It's not cheap to craft an all-aluminum under-bed storage area with lift up struts for gun and bow storage.

It's not cheap to fully insulate our camper and line the interior with durable, lightweight composite material.

It's not cheap to build in an composite constructed electrical center.

We could make it cheap, but then it wouldn't be a Soaring Eagle Camper.
