“The 25FB is the perfect size for a couple like us. There’s plenty of storage and space to spread out, and the convertible dinette adds extra sleeping space if we’re bringing along friends.”

Exterior Features

Timeless style, premium components, and a hand-made process that’s been perfected over the course of more than 90 years. While the interior of Globetrotter is a design-enthusiast's dream, the exterior preserves the iconic riveted aluminum silhouette that has called to generations of travelers. Inspired by Airstream founder Wally Byam’s mid-century European caravans (which led to the original Globetrotter line in the 1950s), today’s Globetrotter captures the spirit of adventure and the tradition of European design in a travel trailer that’s built by hand here in America's heartland.

How It's Made

Informed by more than 90 years of quality craftsmanship and expert design, Airstream travel trailers are hand-made in Jackson Center, Ohio. Only the best materials are used – from seamless, waterproof composite flooring, to the hardware and finishes we use to build our cabinetry, to the rivets and aluminum that form the shell. In building our world-famous travel trailers, we rarely do things the easy way. That's why an Airstream travel trailer can last a lifetime – or more – and be passed down from generation to generation for years of enjoyment.
