

 **ADVENTURER**

2025 Camper Guide

The Difference

Adventurer Campers stand out for their rugged durability, Nordic aesthetic, and compact design, making them ideal for both seasoned adventurers and casual campers. Rooted in Adventurer Manufacturing's TRU product and design ethos, which emphasizes authenticity and transparency, our campers provide customers with straightforward, accurate information, and product they can trust. Features like versatile interiors, off-grid capabilities, and eco-friendly options offer comfort without sacrificing mobility. With a 3-year structural warranty, Adventurer Campers deliver a reliable, well-rounded camping experience that blends adventure with peace of mind.

TRU. COMPOSITE. CONSTRUCTION.

When it comes to quality, we take the high road. Our teams design and source the absolute best materials to ensure superior strength and lightweight performance.

TRU. EXPERIENCE.

We have more experience building slide-in truck campers than anyone out there – bar none. With over 55 years manufacturing campers and over 11 million miles on the road each year, our experience is the driving factor behind our product innovation, design, and quality.

TRU. WEIGHTS.

No games, no hidden weight packages. We take great care in providing accurate truck camper weights and measurements. We believe in providing full transparency for all our lightweight models so you know exactly what you're getting.

TRU. FOUR. SEASON.

Adventurer exclusively uses closed-cell block foam insulation which provides more R-value per inch than standard foam board. 360 degrees of insulation helps you maintain a controlled and comfortable internal temperature, year round + off-sets being insulated.

TRU. CONFIDENCE.

Adventurer Camper's 3-year warranty offers peace of mind by covering structural defects, ensuring long-term durability and protection against unexpected repair costs. With comprehensive coverage and reliable customer support, this warranty reflects our commitment to quality and provides owners with the confidence to enjoy their camper without worrying about unforeseen issues.

// FLOOR PLAN

// FEATURE HIGHLIGHTS

TRU COMPOSITE CONSTRUCTION

Lamilux 4000 high gloss gel-coat fiberglass exterior with closed cell, block foam insulation

PRECISION ROUTING

Panels are CNC routed and cut for laser precision, each panel is locked into the opposing panel to increase structural integrity and strength

ABRAISION-RESISTANT ROOF

One-piece, abrasion -resistant roof material (TPO). Walk-on friendly with 12-year warranty.

STRUCTURE LOC

Custom aluminum extrusion provides rock-solid footing for our camper frames, increasing overall durability.

CABINETRY & WOODWORK

Bonded, screwed and stapled, our cabinetry is bomb-proof. Face mounts are fully laminated with no screws for a clean aesthetic.

INTEGRATED TRUCK TIE-DOWNS

Structurally integrated tie-down points bolt directly to aluminum extrusion for maximum strength.
