LUXURY FEATURES that matter most in Ultra-Lites.

BENEFITS OF A MOLDED PAINTED FIBERGLASS FRONT CAP

PREMIER vs.

3/4" Thick molded painted fiberglass won't cold crack and is strong enough to hold up to rock damage unlike competitors ABS panels.

A true "Cap" is molded over the edges of the sidewall/roof and "Caps" the front end of the trailer preventing any water leaks. Many competitors "caps" are flat ABS panels that have 90 degree seams where it meets the sidewall and also a seam between the panel and rock guard which invites water intrusion.

Keystone's multi-coat paint facility applies three layers of base coat followed by two layers of automotive clear coat. This results in a deeper color & shinier finish than the competitors dyed fiberglass or ABS caps.

BEST TOWING TRAVEL TRAILER IN THE INDUSTRY

Increased MPG and Easier to tow

The rear departure angle increases efficiency of windflow underneath and behind the trailer.

The enclosed underbelly eliminates turbulence caused by exposed frame members, holding tanks, plumbing etc.

Radius shape vertically and also side to side for superior aerodynamics

43" wide stance axle greatly reduces sway and bouncing
