BY LIVIN' LITE

**Ultra Lightweight Automotive Campers**

Thank you for taking the time to consider Livin' Lite in your search for your family's recreational vehicle. Camping for me is about having a great time in the outdoors. It's about sitting around the campfire and making s'mores. And most importantly, it's about quality time spent with family. I believe our team of designers, engineers and builders in Wakarusa, Indiana produce the highest quality and most value-packed campers available today that can be pulled by your current car or minivan - no matter how small! With Quicksilver automotive campers, you will find ultra lightweight, all-aluminum construction and composite wallboard throughout each and every model. Not a stitch of wood to mildew, warp or rot anywhere at anytime. In fact, Quicksilver is known to be one of the most environmentally friendly RVs you will come across, boasting of

98% recyclable materials yet built to last for generations. It is this type of forward-thinking and ingenuity along with a commitment to customer satisfaction that has earned Livin' Lite the honor of being named one of the Top 500 Fastest Growing Privately Owned Companies in the country by *INC. magazine* three years in a row...and counting. I encourage you to check out the competition and compare. I believe you'll find the strength and durability of Quicksilver to be unrivaled in the lite-weight camper market.

Sincerely,

Scott Tuttle

*Livin' Lite Founder*
