

TAKING IT ALL WITH YOU JUST GOT EASIER

REACTOR

THE LIGHTWEIGHT TOY HAULER

Every Trail Leads You Home.

The Reactor 27FS has plenty of room for guests with a jack knife sofa. Two barrel chairs in place of a second jack knife sofa on the door side are optional.

The industry's first barreled roof adds five additional inches of headroom for a roomier feel.

Adventure Begins with a Spark of Genius.

The lightweight, affordable Reactor is built tough for versatility and function. A 102-inch wide body design and 99-inch interior height make for an open concept, lightweight toy hauler.

Adventuring in remote locations is possible with the Reactor's premium utilities. Equipped with an 18-gallon fuel tank and pump system, dual 20-pound LP tanks, 106-gallon fresh water capacity on most models, and 41-gallon gray and black water tanks, the Reactor is outfitted specially to keep you out on the trail longer.

The three-burner range with glass cook top is a convenient feature, not found on similar toy hauler travel trailers.

The Reactor features raised panel cabinets that are screwed and glued—never stapled.

All Reactor garages are outfitted with 6,000-pound D-ring tie-downs mounted to the frame and a seven and a half-foot long, 3,000-pound capacity ramp door for safer loading.

FUNCTION MEETS STYLE.

EverGreen's Reactor features all the necessities you'd expect in an EverGreen and more. Kitchens have all the convenience of home with an eight-cubic foot double door refrigerator, microwave with range hood and flush mount three burner range with glass top and oven.

SSolid Surface countertops and new backsplash add style and make cleanup a breeze. Comfortable bedrooms come standard with queen-size beds, on most models.

NO ONE BUILDS TOY HAULERS LIKE EVERGREEN.

Since we first changed the RV industry with the first composite travel trailer, we've been busy focusing on the innovation front with new manufacturing and material specifications to build a better, lighter weight trailer for your family.
