

# Thunder Jet

PRODUCT & MODEL GUIDE

# Thunder Jet

Established in Clarkston Washington in 1981, Thunder Jet began with founder Darrell Mills heading up sales, his wife Liana doing the books, and employing 1 welder, rig tech and painter. In their first year they produced just 5 boats, but that is all it took and Thunder Jet was the latest industry buzz.

30 Years and over 10,000 boats later, Thunder Jet now holds the position as one of the most successful Aluminum boating companies to ever exist, a direct result of their superior product and continued efforts improve and adapt to the ever changing boating community's needs.

Today Thunder Jet is the most advanced heavy gauge aluminum boat builder in North America. By utilizing and investing in the newest and best in equipment, people, and practices, Thunder Jet Boats are the highest quality, best finished, and best valued boats available today.

Our commitment is to continue finding and investing in better ways to make high quality boats affordable, fuel efficient, resilient and appealing so that more people can enjoy the experiences that boating can offer.

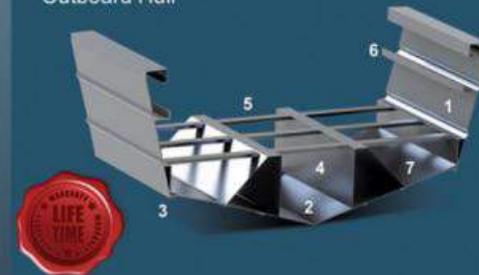

## THUNDER JET FACTS

- Thunder Jet manufactures its own hull components using the latest in computer controlled cutting and forming equipment. This ensures precision, quality, and the best performance possible.
- Thunder Jet employs top craftsmen; in fact our welding team alone has over 300 years of combined experience.
- Thunder Jet manufactures most of its own components, like seats, windows, and tops. This allows us to provide the best quality, style, fit and finish in the industry.
- Thunder Jet hulls are backed by a lifetime transferable warranty.

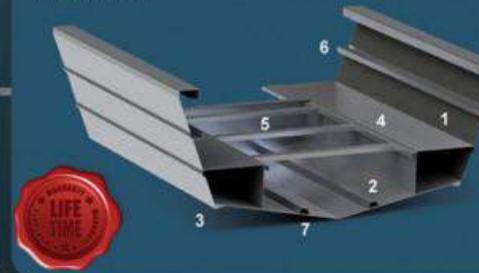

### THE HULL FACTS... SIMPLY BUILT BETTER

Outboard Hull

1. One piece side walls
2. One piece bottom
3. Sides and bottom overlapped and double welded to create triangular structured reverse chine from bow to stern
4. Full depth compound angle stringer reinforces the hull and forms part of the floor
5. Lateral bracing welded in every 18" on center further increasing strength
6. Full length side trays reinforce sides
7. Hull stiffeners welded to bottom further increasing strength

Inboard Hull

650 Ton 26' CNC Acurpress

34' CNC controlled Onsrud router table
