UPGRADE YOUR FOUR WINDS WITH THE OPTIONAL FIBERGLASS SIDEWALL PACKAGE

Fiberglass Sidewall Package Option

Standard Aluminum Sidewalls

A Fiberglass Sidewall Package option is available on all Four Winds models. The Fiberglass Sidewall Package option enhances the appearance of the trailer and protects it from hazards of the road. The option replaces the standard corrugated aluminum exterior siding.

Fiberglass sidewalls, normally available only in higher priced trailers, are available from Four Winds. Another great feature at value prices!

*Consult your vehicle owner's manual for maximum towing capacity before purchasing a recreation vehicle.

Vehicle loading - Every effort has been made to provide the greatest number of options for the recreational vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreational vehicle. Dry weight is the weight of the unit with standard run features. Some optional equipment not included. Net carrying capacity (NCC) is determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options and cargo. Liquid capacities and weights are approximations only. Exterior height includes air conditioner.

Warning - This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing and towing instructions. Vehicles are designed for recreational use only and not intended for use as a primary residence.
