

2010 COACH HOUSE PLATINUM II 240 & 241XL

■ COLOR: Studio (optional deluxe full-body paint)

Efficiency Meets Style in a Great New Package

INTRODUCING THE COACH HOUSE® PLATINUM® II — a downsized Class C motorhome built on the popular Freightliner Sprinter chassis, powered by Mercedes-Benz.

Outside, admire the look of the streamlined Sprinter cab, married to Coach House's patented one-piece fiberglass shell. Inside, appreciate the great floor plans, including a choice of a front dinette or front power sofa, each available in an optional slideout.

What you may appreciate most, though, is the money you will save with the Platinum II. It is the most economical Coach House to operate, thanks to its energy-efficient Mercedes turbo-diesel engine. Depending on options, load, and driving habits, this vehicle may get 20 miles per gallon or better.

Make no mistake, though. The Platinum II is built to the same high standards as every Coach House motorhome. We invite you to compare the Platinum II to other downsized motorhomes, and we know you will agree that the Coach House Platinum II is in a class by itself.
