

# VIKING

Fold-Down Camping Trailers

The possibilities  
are endless.

# The Viking Difference

## Construction & Features Competitors Can't Match

### Warmest Folding Camper in the Industry

What would you rather sleep on?

#### Viking Standard

#### Competitors

#### 1-1/4" laminated insulated bunkend

- Double the industry standard thickness
- Solid wood, steel reinforced frame filled with 1" thick high density foam and laminated with wood panel on top and bottom
- Yields a more stable bedend vs. chipboard or spliced plywood used by other brands
- Insulation improves comfort and warmth

Optional 20M BTU Suburban® Furnace with forced air, electronic ignition and thermostat control. Largest heating capacity of any folding camper.

#### E-Z Rest Reversible Mattresses™

- Softer on one side, firmer on the other. Now you have a choice!
- A higher level of comfort over standard foam or cheap innerspring mattresses used by the competition.

Optional 12V mattress heater.

### Roof Side Z-Rail

Channels water away.

- Z-Rails on roof perimeter and sidewalls keep wood above water level collection points.
- Others use U channel where wood and water can come in contact at the bottom of the channel.
- Channels are kept open to allow water to run out like a gutter.
- Others attempt to seal channels to keep water out; when the seal is compromised, water will collect and cannot escape.

## SST & Coleman® Stove & Stand

### Super Sliding Storage Trunk (SST)

- Rugged 25 cu.ft. rotocast plastic trunk has enough space to take it all with you.
- Trunk slides in both directions on a patented mechanism that provides full access to the trunk interior with the front bed pulled out.
- Trunk lids also flip over to serve as additional shelves/table tops complete with cup holders.

### Lakeside Maple Wood with Natural Touch Finish on Paneling and Cabinet Doors

- Special durable coating resists scratches, moisture and marking
- Feel the difference

### Coleman® Grill Stove with Electronic Ignition and Multipurpose Portable Stand

- True high pressure cooking – fast and efficient
- 25 ft. long grill hose in the Camp Rite package connects the Grill Stove directly to the camper's front gas bottle.
- Portable stand provides stable footing for the Grill Stove, a cooler, garbage bag, etc.; yet it folds up to a compact size that's easy to store.

### Improved Entry Doors

- Redesigned upper screen door makes installation easy and improves alignment and function on 2-piece door models.
- Removable travel door stores out of the way on one-piece door models.

## Wide Trac Suspension

Better safety and stability on the road.

- Widest stance of any folding camper
- Improves towing safety and stability
- Stronger axle beams than most competitors
- Steel frame with automotive E-coat finish. E-coat is a 12 step cleaning and finishing process that applies multiple layers of protection to fully penetrate and coat INSIDE and OUT. Powder coating used by some competitors cannot cover inside surfaces.

## Dura Tuff Roof

- No one else includes the extra wood layer between the top skin and internal foam that provides stiffness and reduces the probability of damage due to hail, road debris, etc.
- Roof vent is placed off to the side so the A/C can be center-mounted without having to remove the vent. This design allows you to have both the vent and A/C.

- The roof is framed with steel supports to accept A/C on all models without extra reinforcement.
- Covered with a seamless exterior.

- Ceiling Board
- Wood Frame & Foam Roof Structure
- Dura Tuff Wood Protective Layer
- One Piece Seamless Skin
