Quality Construction

Frames: All steel frames with outriggers and cross members placed to carry the load for maximum balance and strength. Tandem axles and brakes are on all wheels.

Floors: Covered under floor on all units 2 x 2 floor joists 12" or 16" OC. With R-7 high density fiberglass insulation. 5/8" plywood decking glued to frame on all floors. Deluxe vinyl on floors and deluxe carpet in 5th wheel bedrooms. All floors are bolted to frames, not just lagged.

Sides, Fronts & Backs: All sides, fronts and backs are framed 16" OC and all paneling is glued to frame and stapled to let glue set up. Extra framing is used around doors, large windows and R-7 fiberglass insulation is used. Side walls are set on top of floor and screwed on, and roof is screwed down, not just nailed. Free flowing fiberglass siding is an option.

Roof: Tapered roof rafters 16" OC or bow type rafters 16" OC. Ceiling paneling glued, screwed and stapled, R-7 high density fiberglass insulation is used to fill in between rafters. 1/4" decking is put over the rafters, and Rubber Roof is glued to decking. The Rubber Roof is rolled over corners for a better seal.
