Residential Vehicles

WHY REDWOOD?

From the beginning we set out to change the very nature of what "Residential" means. And the result has been – a game changing fifth wheel that has taken its rightful place as the DEFINITIVE luxury fifth wheel in the THOR family. Why Redwood you ask? Because we have the resources to reject compromise, the experience to know what matters, the ingenuity to outperform expectation and most importantly – the commitment to honor our loyal customers, dealers and employees.

At Redwood, we not only talk the talk but we walk the walk. All Redwood

owners enjoy our exclusive 2+5 Year Warranty. We give you the confidence in knowing you've partnered with the right manufacturer and the piece of mind that we'll protect your investment for years to come.

At Redwood COMFORT is our goal and we are constantly working on new ways to deliver it. The Diamond Furniture Collection incorporates

the entire coach - the Dining Room, Living Room and Bedroom furniture have all been designed for full-time comfort and lasting durability. Residential sprung seating provides superior comfort and support in the areas that need it most. Our frames, mechanisms and box springs are engineered with the highest quality components available. Go ahead, treat yourself, you've earned it.

Redwood's Clima-Comfort package comes standard on all fifth wheels. Clima-Comfort combines Residential fiberglass insulation with UltraFlect reflective insulation to provide a unique thermal barrier that works all four seasons. During the Winter your Redwood reflects escaping heat back towards your living space, reducing heat loss and lowering heating costs. During the Summer it reflects heat away from your living space, blocking significant heat gain in your Redwood fifth wheel and reducing air conditioning costs significantly. 36RL shown in Rustic Cherry and Sonoma Ridge décor.

SINGLE POINT OF CONTACT

Falcon Integrated Technology makes everything easier. One single point of contact makes it easier for OWNERS to understand and easier for SERVICING DEALERS to get answers and solutions. Competitors use a patchwork of suppliers for their coach's foundation making troubleshooting, well, troublesome! Simplify your next RV adventure with a custom FIT foundation from Redwood RV.

FALCON WELDED HITCH RECEIVER

All FIT foundations come equipped standard with an integrated hitch receiver capable of hauling 3,000 pounds of additional cargo (300 pound tongue capacity). Now you can take more fun along for the ride.

THE FALCON FRAME

Every Falcon Frame utilizes the very best materials available:

- ◆ Powdercoated frame for protection.
- ◆ Heavy duty 12" I-Beam main rails.
- ◆ Drop section of chassis is 10" I-Beam.

FALCON HYDRAULIC SLIDE-OUT SYSTEMS

Falcon sets the standard for hydraulic slide-out systems. It provides years of worry free operation and has features that can't be matched by the competition:

- ◆ Faster & quieter than electric slide-outs.
- ◆ One motor system vs. multiple electric motors.
- ◆ Hydraulic Slides can move heavier rooms.
- ◆ Provides a much smoother slide movement – No jerking.
- ◆ One vs. multiple manual override ports.

FALCON PINBOX SOLUTIONS

FIT foundations come standard with the Trail Air™ Rota-Flex pivoting head pin boxes. Rota-Flex utilizes a rubberized compound which absorbs fore to aft motion, a.k.a. "chucking," between the tow vehicle and 5th wheel to give you an overall improved ride.

FALCON AXLES

- Falcon 7,000 pound capacity axles are built to last and offer many advantages over the competition:
- ◆ Self Adjusting Brakes improve stopping time up to 50% and lower maintenance costs.
 - ◆ Powder-coated axle tubes protect against corrosion.
 - ◆ Zinc plated mounting hardware prevents against rusting and corrosion improving service jobs.
 - ◆ Waterproof 3M connectors in all brake wiring prevents corrosion at connection point.
 - ◆ Integrated spindle/brake flange provides precise brake mounting and maximizes performance.
 - ◆ Robotically welded spindles and spring seats provide precision and can be traced to production run.

FALCON SUSPENSION

Your suspension should absorb road shock, not transfer it! This is why all FIT foundations are equipped standard with the Falcon-Flex rubberized suspension system. Falcon Flex provides owners a much smoother ride by virtually eliminating vibrations caused by road bumps, holes and cracks. This system, tested independently by Roush, scored a 7.5 as opposed to the competition's 5.5. Falcon Flex was put through grueling load tests and passed with flying colors.

FALCON QUAD STEPS

The Falcon Quad Radius Step is simply a better step. More logically laid out than its competitor's, the Falcon radius step stores easier and is easier to use. With one hand, the step can be expanded and retracted with little effort.

FALCON AUTOMATIC LEVELING

No more crawling on the ground with boards or blocks to get your coach level because every Falcon Frame comes standard with the Falcon Level Up System. Save time and energy setting up with the best leveling product on the market:

- ◆ One touch automatic leveling gets you camping in under 45 seconds.
- ◆ Fast and powerful aluminum hydraulic leveling jacks extend and retract in mere seconds all while adding less weight to the coach.
- ◆ One hydraulic pump as opposed to the competition's four.
