X-V is Forward Thinking

The 60/60 Rule of the Cougar X-V

The Cougar X-V 30FKV pictured above is a prime example of how the Cougar X-V uses "forward thinking" to design unique floorplans that are not available in conventional travel trailers.

The X-V Series features two 20lb. LP tanks that make it easy to refuel at any propane exchange. The convenient sliding battery box is sealed and lockable for your battery's protection.

The V-Shock Suspension System was specifically designed to extend the v-nose even further over the a-frame while maintaining maximum performance. Another example of X-V's forward thinking that is exclusive to Cougar X-V.

XV VAULTED CEILING

Vaulted ceilings are now standard in the Cougar X-V travel trailers adding 4" of interior ceiling height.
