STRENGTH:

1 Fiberglass that is laminated to a 2 1/8" luan board. We then laminate a second layer of 3 1/8" luan, which acts as a vapor barrier, ensures the walls are straight and smooth, and helps eliminate thermal transfer. The luan sheets are staggered during this process for added strength, durability and a smoother finish. 4 Double welded aluminum structure and block foam insulation. Finishing with 5 1/8" luan covered with 6 decorative wall vinyl
