

# i-Go

LITE by EVERGREEN

I Go, You Go,  
We all Go Camping in an EverGreen!

### An EverGreen for Everyone.

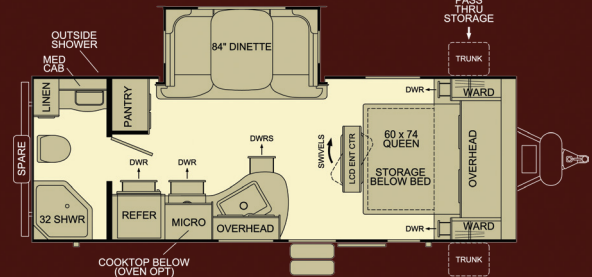

The concept of the i-Go Lite travel trailers and fifth wheels is to provide economy conscious camping families the opportunity to own a lightweight, quality built EverGreen. The i-Go is crafted with the same aluminum-framed, vacuum-laminated processes and quality control systems as all EverGreen products.

### The Advantages of Owning an i-Go Lite by EverGreen

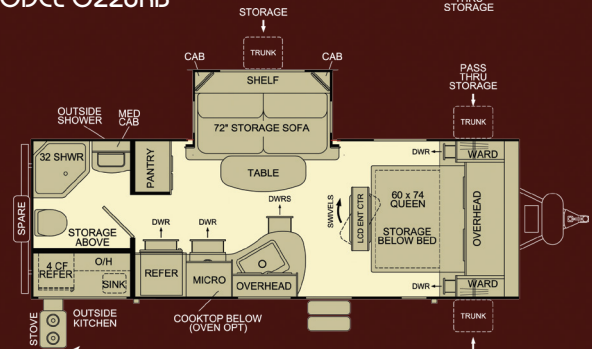

- **i-Go is lighter weight and easier to tow** because of its narrower, seven-foot six-inch width. With less wind resistance, the i-Go tracks smoothly behind smaller tow vehicles such as half-ton pickups or mid-sized SUVs. The entire i-Go Lite series trailers are less than 30 feet in length and weigh less than 5,000 pounds.
- **Built better, yet more affordable** with a fiberglass reinforced exterior skin, the i-Go still features EverGreen's innovative, lightweight composite inner shell to reduce rot, mold and mildew. Composites also lower off-gassing of VOC's for healthier camping.
- **EverGreen's vacuum laminated composite construction** is bonded onto a fully welded and reinforced aluminum frame. The combination of seamless composite materials and vacuum lamination result in added durability and higher R-values. The i-Go is a true EverGreen at a more affordable price.
- **Deeper, 42-inch slide outs are above the wheel-well to provide** higher ground clearance. Six-inches deeper than the competition, i-Go Lite slides provide the living space of an eight foot wide trailer yet has the towability of a seven and one half foot wide trailer. Slides are driven in all four corners with EverGreen's quality, four point, gear driven system to provide smoother operation and a tighter seal.

## The i-Go Lite Difference--from the Inside Out

### Walls

1. Composite inner shell
2. Fully welded aluminum frame
3. High-density, block foam insulation
4. Plywood substrate
5. Glossy fiberglass reinforced exterior

### Roof

6. Composite inner shell
7. Fully welded, walk on, crowned aluminum frame
8. High-density, block foam insulation
9. Plywood substrate
10. Reflective, white TPO roofing

### Floor

11. Enclosed, seamless underbelly
12. Woven plastic floor brace
13. Plywood substrate
14. Fully welded aluminum frame
15. High-density, block foam insulation
16. Seamless composite inner shell
17. Tough, temperature resistant Beau Flor linoleum
18. Steel I-beam frame
