30. Radiant-Foil Insulation
31. Aluminum Frame floor joist
32. Slam latch Baggage Doors

FUZION CONSTRUCTION

Superior construction to provide long lasting durability means you will e

6 POINT HYDRAULIC AUTO LEVELING SYSTEM

This system has the strength to lift 60,000 lb. off the ground-need to change a tire? No problem! Most importantly though, is the ease of use. One touch and the coach levels itself.

It also remembers the point at which you unhook from the truck so when it comes time to hitch back up-press a button and you are back at that height! Other brands use an electric system which is slower, weaker, and you have to pull the pins on all 6 legs to get them to drop!

360° INTERIOR VIRTUAL TOUR
AVAILABLE AT KEYSTONERV.COM

Enjoy your Fuzion for years to come.

STATE OF THE ART FRONT CAP

Fuzion's front cap design leads the way in both form and function. This new cap offers improved turning radius and the sleek aerodynamic shape helps improve towability and handling.

Cap is equipped with LED docking lights, and Hitch Vision to make hitching and unhitching a breeze both day and night. Additional LED lights on the cap add a distinctive look to your new Fuzion.

All Fuzion fifth wheels are now high profile for more headroom in the bedroom area and also share the same cap.

BLIZZARD PACKAGE

Fuzion's Blizzard Package offers the best in the industry when it comes to high tech insulation. Don't be fooled by advertisements which claim "Tested to Zero Degrees". Ever ask them if it passed or failed? Fuzion's Blizzard Package is the real deal with R31 "Radiant Foil Technology". This insulation is used in the floor, wrapped around all of the holding tanks, used in the ceiling and wrapped around the front of the unit under the cap and in the gooseneck floor resulting in an R-factor of 24 under the bedroom. At Fuzion, we also use RFT R-24 in the slide rooms as well. To enhance the RFT's ability to maintain temperatures, we duct heat into the garage and the pass through compartment. This process exceeds most of the competition who claim the compartments are heated while it is only a heat duct passing through without a register delivering hot air! Fuzion also installs two attic vents helping to eliminate the possibility of condensation build up in the roof insulation.
