V-CROSS DESIGN VS. FLAT FRONT TRAILERS

The unique V-Cross design maximizes headroom and storage room.

V-Cross design directs air flow around the sides of the trailer. Air impacts and scatters around and above flat front trailers.

GET THE V-CROSS ADVANTAGE

MORE USABLE SPACE – BETTER AERODYNAMICS

The V-Cross shape creates 75 cu. ft. of extra interior space for larger bathrooms, bedrooms and kitchens with full interior height at the front end of the trailer. The “V” design cuts through wind, improving aerodynamics for better fuel efficiency. LP bottles and batteries are safely enclosed. Air flow around the front end deflects bugs and debris, keeping the unit clean and improves towability.

Forest River, Inc. encourages our customers to purchase their Forest River products from a local dealership whenever possible for the following reasons:

- 1) Forest River, Inc. dealers are independently owned and operated businesses so priority service and scheduling is at their discretion and is often provided to customers that purchased their unit at that dealership.
