

Travel Trailers

Every Vacation
Begins with
One Step.

EVERGREEN
RECREATIONAL VEHICLES

Disconnect, Unwind, Find your Escape. Lightweight Towability has Never been so Affordable.

It's time to recharge in your I-GO travel trailer. Packing up the family for a weekend trip is simple with the well-equipped, ultra-light I-GO. Large and compact floorplans feature quality kitchens, upgraded entertainment systems and room for the entire family. All the standard features and quality construction expected in an EverGreen can be found at a more affordable price point.

Families with smaller tow vehicles will find better tracking and easier towing behind half-ton pickups and mid-sized SUVs. The interior is still roomy with 42-inch slides housing the dinette and sofa, in some models, giving you more living space to enjoy.

With a wide variety of floorplans to choose from, you're guaranteed to find the trailer that's perfect for your family.

G260BH

Kids will love to escape in the G260BH bunks and you will love the added storage underneath.

G260BH

The entertainment center in the G260BH features radius sides, removing sharp corners is safe and stylish.

After a day of exploring, unwind and recharge in comfort and style.

Spacious interiors for family fun.

EverGreen's I-GO travel trailer is second to none when it comes to family camping. An open concept living area is possible with 42-inch deep slides that house the dinette for an exceptional amount of seating and entertaining space. The galley style kitchen opens up the living and kitchen areas so no one feels left out. Kitchens are fully equipped with a microwave, three-burner range and double door refrigerator—all standard. Radius sides on the entertainment center continue the open flow of the rooms and removing sharp corners makes it as safe as it is stylish.

Memories will last, so will your I-GO.

Memories of family camping trips will never fade, and neither will your I-GO. The "EverGreen Difference" is evident starting with a one-of-a-kind mechanically applied TPO roof that saves your family time and money. Built with the DuraLite™ six-sided double welded cage construction, it has a secure frame for the ultimate in durability.

Begin your adventure.

With one of the largest selections of floorplans at the most affordable price, this family classic has exactly what you need and is easy to tow so it can take you where you want to go.

Deep slides and a galley kitchen give the I-GO an open concept feel with stylish touches—decorative window valances hide pull down blinds during the day.

No one builds travel trailers like EverGreen.

Take the time to compare because there is an "EverGreen Difference." Since we first revolutionized the RV industry with the Ever-Lite travel trailer, we've been busy focusing on the innovation front with new manufacturing and material specifications to build a better trailer for your family.

Construction Features

Walls

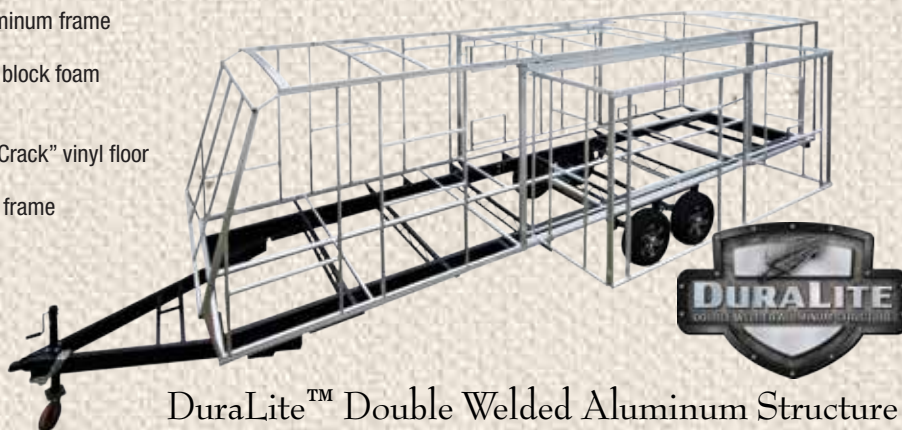

- 1** DuraLite aluminum frame
- 2** High-density, block foam insulation
- 3** Plywood substrate
- 4** Glossy, fiberglass reinforced exterior

Roof

- 5** Fully welded, crowned aluminum frame
- 6** High-density block foam insulation
- 7** Plywood substrate
- 8** Reflective, white TPO roofing

Floor

- 9** Enclosed seamless underbelly
- 10** Woven plastic floor brace
- 11** Plywood substrate
- 12** DuraLite aluminum frame
- 13** High-density block foam insulation
- 14** Padded "No-Crack" vinyl floor
- 15** Steel I-beam frame

DuraLite™ Double Welded Aluminum Structure

I-GO is built on the DuraLite Double Welded Aluminum Structure. It includes six-sided double-welded aluminum frame construction in the walls, roof and floors, with header framing around all doors, windows and baggage door openings. Our strong, durable frame eliminates flexing and DuraLite is superior to wood frame construction used in other travel trailers, which can rot when exposed to water.

Vacuum Lamination

I-GO is built with vacuum lamination in the roof. Dense, block foam insulation is coated with a water-based urethane adhesive which becomes super bonded under the heat and high pressure of EverGreen's vacuum lamination process. The result is a stronger, yet lighter and more durable coach that's better insulated for all seasons.

TPO Roofing

Bright white, mechanically applied, vacuum laminated TPO roof membrane is superior to rubber roof membranes that can bubble, loosen, mold, mildew or chalk. The TPO glue is spread evenly to create a surface that is cooler and won't mold or mildew. It also requires less maintenance than conventional roofs.

Standard Features and Optional Packages

CONSTRUCTION

- Steel I-beam frame
- Laminated sidewalls roof and floors
- Tough fiberglass reinforced exterior
- Fully welded DuraLite™ aluminum framed sidewalls, roof, floor and window framing
- Crowned roof fully laminated with white, reflective TPO material
